PREFACE

In this present report you will find the preliminary results of the @Tourist Survey – First Quarter, 2005", executed by the Central Bureau of Statistics. Data from other sources as Aruba Tourism Authority, Cruise Tourism Authority, Department of Immigration at the International Airport of Aruba, Central Bank of Aruba, etc., can also be found. Much analysis is not really necessary since the tables are on themselves self explanatory.

Tourism is the main economic activity on the island. For that reason the Central Bureau of Statistics, in cooperation with other institutions, has chosen to conduct surveys, mainly to measure the tourist expenditures and the satisfaction levels among others. In the System of National Accounts framework, this data is very important for estimating the impact of the Tourism Industry on the island=s economy.

The Central Bureau of Statistics published the results of several surveys over the years 1996 until 2004. The Tourist Profiles include results of the ATourist Survey@ for every quarter from 1996 until 2004. The reaction of the partners was very positive and demonstrated the existing necessity for such data.

The realization of the Tourist Survey for the year 2002 was possible thanks to the cooperation and excellent work of the interview-team and the Central Bureau of Statistics project group, which consists of Marleen Barendregt-Croes, Mary Geerman, and Louisette Christiaans-Yarzagaray M.Sc.

The Tourist Profile, Volume I – First Quarter 2005 is mainly a product of the Tourism Statistics division which is part of the Social Economic Statistics division of the Central Bureau of Statistics consisting of Marleen Barendregt-Croes (assistant) Mary Geerman (assistant) and Louisette Christiaans-Yarzagaray, M.Sc. (Tourist Profile project leader and editor).

A special thanks goes to all other Central Bureau of Statistics staff, specially Marjolene van der Biezen-Marques B.A. and Richard Werleman. Without them the scanning process, which replaced our data-entry system in the year 2000, could not be possible. Thanks also to all the data-suppliers and supporters who contributed in any other way to this publication. A word of thanks goes also to the hotels who are member of the AHATA, for their cooperation by sending their information every month. Last but not least, a word of thanks goes to the Aruba Airport Authority and the U.S. Department of Immigration and Customs for allowing our interview-team to conduct the survey in departure halls.

The Central Bureau of Statistics hopes that this Tourist Profile, Volume I – First Quarter 2005 will provide all the users with necessary information. Other information that you might need or for comments and further information, feel free to contact us.

Drs. R.A. Lee Director of the Central Bureau of Statistics Aruba

FOREWORD

In the present and former publication the CBS used the macro-economic concept ATotal tourism expenditure@. This concept has been used as an indicator in former publications, but only in the last issue it is presented as an estimated macro-economic variable.

Initially, the only monetary indicator published by the CBS was the average daily expenditures in Aruba, which is the total consumption expenditure made by a stayover visitor (during his/her stay in Aruba) or on behalf of a visitor for and during his/her trip and stay at a destination. This information is presented per quarter and also a year figure is presented at the conclusion of each year.

To get a better picture of the visitor expenditures in Aruba, the average daily expenditure is multiplied by the average length of stay of the visitors and by the number of stayover visitors. This is then the tourism expenditures in Aruba which indicates the amount of money all visitors left behind in Aruba during their stay in Aruba, either per quarter or per year. To bring this figure to a higher stage (a macro total), a total tourism expenditure is estimated. This total tourism expenditure is all the travel related expenditures made by stayover visitors, before, during, and immediately after a trip, which is the tourism expenditure in Aruba plus an estimated accommodation calculation of the pre-paid packages.

Total tourism expenditure measures the total amount of money tourists visiting Aruba in a certain quarter spent in that quarter on tourism related goods and services. The amount of money value stayover visitors spent on tourism related goods and services should ideally be equal to goods and services produced in a certain quarter.

The total tourism expenditure is measured on an accrual basis. Accrual accounting records flows at the time economic value is created, transformed, exchanged, transferred or extinguished. This means that flows which imply a change of ownership are entered when ownership passes, services are rendered when provided, output at the time products are created and intermediate consumption when materials and supplies are being used. The System of National Accounts (SNA) favors accrual accounting because:

- (a) The timing of accrual accounting is in full agreement with the way economic activities and other flows are defined in the System. This agreement allows one, for instance, to evaluate the profitability of productive activities correctly (i.e., without the disturbing influence of leads and lags in cash flows) and to calculate a sector=s net worth correctly at any point in time;
- (b) Accrual accounting can be applied to non-monetary flows

The Central Bank of Aruba, on the other hand, measures the tourism receipts. A comparative analysis shows that the concepts of tourism receipts and total tourism expenditure are not identical. Differences in approach and operational definitions of the two concepts leads to differences in the figures measured. It is therefore methodologically not appropriate to correlate tourism receipts and tourism expenditure with each other, without indicating the difference in these two concepts. It is strongly recommended to users to clearly distinguish tourism receipt from tourism expenditure. For supplementary information please refer to the methodology.

TABLE OF CONTENTS

Preface	iii
Foreword	
Table of Contents	v
1. Highlights	<i>TP</i> – 1
2. Tourism in Aruba	2
2.1 Number of stay over visitors by market	
2.2 Cruise passengers

4. Money Aspects of the Visitors	8
4.1 Average daily expenditure spent in Aruba per category	
4.2 Average daily expenditure by place of residence	
4.3 Average daily expenditure by purpose of visit	
4.4 Average daily expenditure by number of visits to Aruba	
4.5 Hotel related statistics	
4.6 Average expenditure per person per trip by the major markets (Budget)	
4.7 Tourism expenditure in Aruba by the major markets	
4.8 Lodging tax4.9 Casino tax	
4.9 Casino tax	
4.10 Tourism receipts	
4.11 Estimated total tourism experioriture	

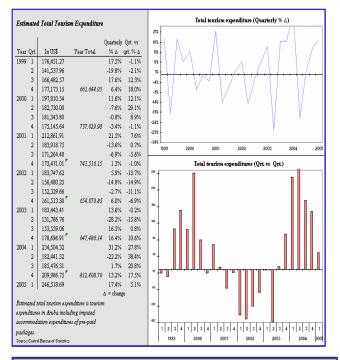

1. Highlights

Tourism has assumed considerable importance in many countries and regions and its role in economic development has become particularly significant through its potential to increase governments' revenues and stimulate investment.

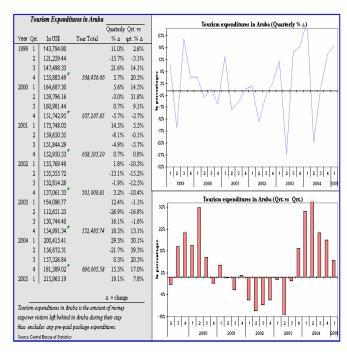

The goal of this publication is to measure the economic benefit that tourism provides by promoting tourism statistics as a means for public policy-makers and the private sector to gain a better perspective of tourism's overall economic impact. It also provides a strategic tool to better formulate their marketing and development plans.

The following presents tables and graphs with comparisons and percentage changes of the most important tourism indicators. They give a general view of how tourism developed in the first quarter of the year 2005 compared to the year 2004, 2003 and 2002.

An important indicator is the estimated total tourism expenditure which indicates all travel related expenditures made by stay-over visitors, before, during, and immediately after a trip (refer to methodology for further explanations).

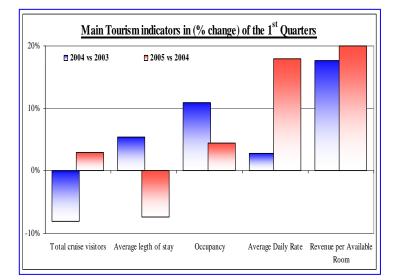

Main Economic Indicators:	Qnt. 1 2000	Qn. 1 2001	Qrt. 1 2002	Qrt. 1 2003	Qn. 1 2004	Qrt. 1 2005
Total stayover visitors	179,192	183,572	168,427	155,346	177,098	200,868
Total cruise visitors	208,735	195,713	215,581	201,400	185,161	190,659
Total number of visitors	387,927	379,285	384,008	356,746	362,259	391,527
Total number of visitor nights	1,380.9	1,371.4	1,290.2	1,279.4	1,446.5	1,169.0
Average legth of stay	7.90	7.90	7.70	8.60	9.10	8.40
Average daily expenditure in Aruba	115.75	119.96	120.48	114.81	124.77	127.69
Tourism expenditure in Aruba	164,687,300	173,748,030	155,769,480	154,096,770	200,415	215,963
Estimated total tourism expenditure	197,810,540	212,861,910	183,747,620	183,443,409	234,504	246,519
Tourism receipts	254,022	261,620	262,346	246,592.00	549.50	549.50
Occupancy	81.5%	83.6%	75.8%	76.4%	84.5%	83.3%
Average Daily Rate	162.62	176.62	182.07	176.83	183.18	207.89
Revenue per Available Room	98.54	110.00	95.54	90.86	106.96	123.65

The first combination of table and graphs present the estimated total tourism expenditure in every quarter starting from the years 1999 until 2005. It also gives quarterly percentage changes and quarter to quarter comparisons.

Beside estimated total tourism expenditure, tourism expenditures that took place in Aruba are also used as an indicator since 1996, which is illustrated in a combination of table and graphs. This indicator gives the amount of money stay-over visitors left behind during their stay in Aruba.

The following table presents the different main tourism indicators of the first quarter of 1999 until 2005. The table contains absolute data related to the visitors (stay-overvisitors and cruise visitors), the duration of their stay in Aruba, the expenditures that they made in US dollars, and hotel related statistics as occupancy in percentage, average daily rate and revenue per available room both in US dollars.
