A note to the reader

The following report presents the price statistics for September 2013.

- At the end of September 2013 the Consumer Price Index (CPI) shows a slight increase of 0.03% compared to the end of August 2013. The sector which affected the CPI the most was “Recreation and culture” (0.5%), which led to an effect of 0.05 percentage points (ppts) on the Δ CPI of September 2013 (0.03%).
- Compared to September 2012 the CPI decreased by 1.5%. The sector which affected the CPI the most was “Housing” (-4.8%). Specifically, the price of “Electricity, gas and other fuels” decreased by 15.4% and caused an effect of -1.59 ppts on the end of period inflation of September 2013 (-1.5%).
- The period average inflation for the period September 2012 - September 2013 is -2.9%, which is 5.8 ppts lower compared to the period average inflation for the period September 2011 - September 2012 (2.9%).
- Utilities (Water and Electricity) did not register price changes in September 2013. The price of gasoline decreased by 0.7% and caused an effect of -0.05 ppts. The price of diesel registered an increase (2.0%) in September 2013 and had an effect of 0.01 ppt on the Δ CPI of September 2013 (0.03%).

This report is divided in 7 sections. An overview of the monthly percentage changes in the CPI and index per sector is presented in section 1. Section 2 provides the yearly percentage changes in the CPI and index per sector. The development of indices of main sectors and utilities is outlined in section 3. Section 4 presents the percentage change in the CPI of Aruba’s major trading partners and compares the CPI of Aruba and the USA. Section 5 presents an overview of the monthly and yearly percentage changes of the core inflation. Section 6 presents the price movements in food & catering services. The development of the subsistence level is presented in section 7 and is followed by the appendices.

2 End of period change of the CPI

2.1 End of period change CPI for September 2013

The CPI decreased from 119.38 in September 2012 to 117.54 in September 2013, a decrease of 1.5%. This Δ CPI is the third lowest registered over a period of 5 years for the month September, and is 0.6 pts higher than the Δ CPI registered in 2012 (-2.1%) (see table 2).

Table 2: End of period Δ CPI for September, 2009 - 2013

Period	Δ CPI	Index
2008-2009	-3.7	114.97
2009-2010	-0.4	114.47
2010-2011	6.5	121.91
2011-2012	-2.1	119.38
2012-2013	-1.5	117.54

Source: Central Bureau of Statistics Aruba

2.2 Changes in sector

An overview of the percentage change per sector over the period September 2012 - September 2013 is presented in table 3. The largest Δ I is observed for the sector "Alcoholic beverages and tobacco" with an increase of 8.0%. The increase in the "Alcoholic beverages and tobacco" sector is mainly caused by an increase in the category "Tobacco" (24.2%). Furthermore, increases of 2.6% and 1.5% are observed for the sectors "Recreation and culture" and "Restaurants and hotels" respectively. A comparison of the Δ I's for the years 2012 and 2013 is provided in figure 4.

Table 3: Percentage change for September, 2012 - 2013

Sector	% Change
Food and non-alcoholic beverages	-0.3
Alcoholic beverages and tobacco	8.0
Clothing and footwear	-5.6
Housing	-4.8
Household operation	-0.7
Health	-1.1
Transport	-0.7
Communications	0.3
Recreation and culture	2.6
Education	0.0
Restaurants and hotels	1.5
Miscellaneous goods and services	0.7
CPI	-1.5

Source: Central Bureau of Statistics Aruba

2.3 Changes in categories

The largest positive and negative Δ I in categories observed over a period of one year are respectively, "Holidays" (45.6%) and "Electricity, gas and other fuels" (-15.4%). For an overview of the end of period percentage changes per category refer to table 16 in Appendix 1.

Figure 4: Δ I per sector

2.4 End of year change CPI 2004 - 2013

The end of year Δ CPI for the period 2004 - 2013 is shown in figure 5. The Δ CPI for 2013 is calculated by comparing the CPI of September 2013 with the CPI of December 2012. At the end of each year, the end of year percentage change equals the ytd Δ CPI. The ytd Δ CPI for September 2013 is 0.6%.

Figure 5: End of year Δ CPI 2004 - 2013

*ytd

2.5 Period average change CPI for September 2013

The period average change CPI (Δ ACPI) for September 2013 is -2.9%. Table 4 provides an overview of the Δ ACPI for the month September for the years 2009 to 2013. The Δ ACPI for 2013 decreased by 5.8 pts compared to 2012.

Table 4: Overview of Δ ACPI for September, 2009 - 2013

Period	Δ ACPI	Index
2008-2009	-1.5	111.64
2009-2010	2.7	114.60
2010-2011	2.7	117.64
2011-2012	2.9	121.01
2012-2013	-2.9	117.48

3 Development of indices of main sectors and utilities

3.1 Indices main sectors

The four major sectors, “Housing”, “Transport”, “Food and non-alcoholic beverages” and “Recreation and culture”, constitute 64% of the total weight of the basket of goods and services, which are observed on a monthly basis. An overview of the course of indices for 2007 up to September 2013 per sector and for the CPI is provided in figures 9-1 to 9-12 in Appendix 4.

Changes in the indices of the sectors “Housing” and “Transport” are mainly the result of changes in the international oil prices and prices of utilities during the respective months. The development of crude oil, fuel surcharge, electricity, water, gasoline and diesel prices is provided in table 5 and in the adjoining figures 6-1 and 6-2.

Table 5: Prices of utilities, gasoline and diesel, 2012 - 2013

Month	Crude oil per barrel ¹	Fuel surcharge ² ≤ 500 kWh	Fuel surcharge ² 501-1000 kWh	Electricity ³	Water ⁴	Gasoline ⁵	Diesel ⁵
Sep-12	94.57	32.49	38.47	363.27	137.05	244.70	214.40

¹ Average West Texas Intermediate (WTI) crude oil price per barrel in US\$ (Source: U.S. Energy Information Administration)

² Fuel surcharge in Afl. cents per kWh

³ Electricity price in Afl.

⁴ Water price in Afl.

⁵ Gasoline and diesel prices in Afl. cents per liter

3.2 Electricity

The price of electricity is determined in Aruban florins (Afl.) for an average usage by households. The average usage is 725.5 kWh per month. The electricity price for an average consumption of 725.5 kWh did not change in September 2013, it remained at Afl. 306.75. Figure 6-1 provides an overview of the course of changes in the electricity price for the period 2009 to 2013.

The component in the electricity tariff which is sensitive to price changes is the fuel surcharge (brandstofclausule). Fuel surcharge for a usage of electricity up to 500 kWh surcharge did not change in September 2013, it stayed at Afl. 24.60 cents per kWh. Fuel surcharge for a usage of electricity between 501 - 1000 kWh did not change in September 2013, it stayed at Afl. 30.90 cents per kWh.

3.3 Water

The price of water is determined in Afl. for an average usage (water consumption) by households. Figure 6-1 provides an overview of the course of changes in the water price for the period 2009 to 2013. The water price for an average usage by households did not change in September 2013, it remained at Afl. 137.05.

3.4 Gasoline and Diesel

The retail price of gasoline decreased by 0.7% from 239.4 cents per liter in August 2013 to 237.8 cents per liter in September 2013. In September 2013, the retail price of diesel registered an increase of 2.0% from 204.2 cents per liter in August 2013 to 208.3 cents per liter.

¹ End of period inflation

² Period average inflation

The Δ CPI of Aruba over the last 12 months is 2.7 pts lower compared to the USA's 12-month Δ CPI. The Δ CPI over the last 24 months for Aruba is 4.5 pts lower than the Δ CPI of the USA. The monthly inflation for both Aruba and the USA is depicted in figure 7 over a period of one year. Furthermore, an overview of the end of year Δ CPI over the period 2003 - 2013 for Aruba and the USA is provided in table 8 and figure 8.

*ytd

² "55% of Aruba's import by sea and air originates from the USA" (Source: Foreign Trade Statistics Report, 2nd Quarter 2013).

5 Core inflation

5.1 Core inflation

Core inflation is a measure of inflation which excludes certain items that face volatile price movements e.g. food products and energy. By calculating the core inflation these more volatile components are eliminated from the inflation. Core inflation indices serve to assess the mid- and long-term trend of the overall price level. For the purpose of adjusting monetary policy, many economists focus more intently on the core rate of inflation, as this allows for an in-depth assessment of inflationary processes ongoing in the economy.

5.2 Monthly change of the core inflation

In September 2013 the core inflation (measured over the period September 2012 - 2013) was 0.1%, 0.7 pts lower compared to September 2012. In September 2013 the food index shows a decrease of 0.1%, while the energy index had a decrease of 13.1%. Over the past year the food index decreased by 4.4 pts and the energy index decreased by 21.7 pts. Table 9 provides an overview of the monthly inflation and core inflation starting from September 2012.

Table 9: Monthly inflation¹ and core inflation, 2012 - 2013

Period	Inflation	Food	Energy ²	Core Inflation
Sep-12	2.9	4.3	8.6	0.8
Oct-12	2.2	3.7	6.4	0.6
Nov-12	1.4	3.1	3.7	0.4

6 Development of Food & catering services

6.1 Monthly change of Food & catering services for September 2013

The “Food & catering services” index increased by 0.1% in September 2013, after an increase of 0.3% in August 2013. The index for “Food at home” shows a slight increase of 0.01% in September, as six of the eleven “Food at home” indices increased in September 2013. The “Potatoes and other tubers” index registered the largest increase (7.3%) in September and was mainly caused by an increase of 9.3% in the index for “Potatoes”. The indices for “Fruit”, “Fish and other seafood” and “Food products n.e.c.” registered increases of 1.0%, 0.6% and 0.3%, respectively. The “Vegetables” index decreased the most (-1.9%). The “Meat” index declined by 0.4%. The indices for “Non-alcoholic beverages” and “Sugar, jam, honey and other confectionery” posted both a decrease of 0.1%.

Table 11 provides an overview of the corresponding weights per food group together with the percentage changes and effect for September 2013.

Table 11: Percentage change of Food for September 2013

Food	Weight	% Change	Effect
Food & catering services	1,492.8	0.1	0.02
Food at home	1,125.3	0.01	0.00
Bread and cereals	205.2	0.1	0.00
Meat	229.8	-0.4	-0.01
Fish and other seafood	56.4	0.6	0.00
Milk, cheese and eggs	140.0	0.0	0.00
Oils and fats	31.6	0.1	0.00
Fruit	72.0	1.0	0.01
Potatoes and other tubers	18.5	7.3	0.01
Vegetables	75.7	-1.9	-0.02
Sugar, jam, honey and other confectionery	49.6	-0.1	0.00
Food products n.e.c.	82.7	0.3	0.00
Non-alcoholic beverages	163.9	-0.1	0.00
Food away from home	367.5	0.4	0.02

Source: Central Bureau of Statistics Aruba

Reference is made to table 18 in Appendix 3. Table 18 provides an overview of the monthly and end of period percentage changes and effect for September 2013 for the food groups.

In September 2013, “Food at home” and “Food away from home” as a group show an increase in price of 0.1% compared to August 2013, and had an influence of 0.02 ppts on the CPI, while the remaining goods and services, as a group, experienced a slight increase in price of 0.02%, causing an effect of 0.02 ppts on the CPI.

An overview of the percentage change and effect for “Food at home” and “Food away from home” for September 2013 is presented in table 12.

Table 12: Effect on the CPI of September 2013 of "Food at home" and "Food away from home"

Category	Weight	% Change	Effect
Food at home	1,125.3	0.01	0.00
Food away from home	367.5	0.4	0.02
Total group	1,492.8	0.1	0.02
Remaining goods and services	8,507.2	0.02	0.02
CPI	10,000.0	0.03	0.03

Source: Central Bureau of Statistics Aruba

Figure 11 depicts the monthly Δ Food and catering services over a period of one year starting from September 2012.

6.2 End of Period change of Food & catering services for September 2013

Over the last 12 months the “Food & catering services” index has increased by 0.1%. The “Food at home” index shows a decrease of 0.3%. The “Fish and other seafood” index increased by 2.8%, the largest increase among the “Food at home” food groups, while the “Potatoes and other tubers” index shows the largest decrease (-8.5%). The index for “Food away from home” shows a 0.4% increase in September, after being unchanged in August 2013 and has increased by 1.5% over the last 12 months.

7 Subsistence level

7.1 Subsistence level

The subsistence level is the minimum level of income which is perceived necessary to achieve an adequate standard of living in a given country. The subsistence level is usually determined by estimating the cost of all the essential resources that an average adult consumes in one month or year. This is commonly called a basic needs index, and varies according to the price of food, clothing, housing, transport and other items in the "basket". Equivalence scales are used to adjust for the assumed standard of living, of households of different sizes and composition. The scale assigns a weight of 1.0 for the first adult and 0.5 for each additional adult in the household (aged 15+) and a weight of 0.3 for each child (aged 0-14 years). The subsistence level is based on figures of the report "Bestaansminimum 2010" published by the CBS in November 2010 and is monthly updated for inflation using the monthly CPI. The reference unit used in this report is one of a household consisting of two adults and two children (aged 0-14 years).

7.2 Monthly change of the subsistence level for September 2013

Table 13 provides an overview of the subsistence level for a family of two adults and two children (aged 0-14 years) by sector registered over a period of 5 years for the month September. Over a period of one year the subsistence level decreased by Afl. 85, from Afl. 4,356 in September 2012 to Afl. 4,271 in September 2013. The "Housing" sector shows the largest decrease (-Afl. 69), while the largest increase was registered for the "Recreation and culture" (Afl. 5) over this period.

Table 13: Monthly subsistence level in Aruba (in Afl.) by sector for a family of 2 adults and 2 children (aged 0-14 years) for September, 2009 - 2013

Sector	Sep-09	Sep-10	Sep-11	Sep-12	Sep-13
Food and non-alcoholic beverages	1,442	1,413	1,502	1,518	1,513
Clothing and footwear	325	304	306	272	257

7.3 Comparison of the subsistence level and minimum wage

In September 2013 the subsistence level for a single adult household is Afl. 2,034, which represents an income deficit of Afl. 397, a decrease of Afl. 72 compared to the deficit observed one year ago (Afl. 469). This deficit is the lowest registered over a period of five years for the month September.

Table 15: Monthly income surplus/deficit (in Afl.) for a single adult household for September, 2009 - 2013

Period	1 adult	Minimum	
		wage	Surplus/deficit
2009	2,000	1,543	-457
2010	1,996	1,543	-453
2011	2,125	1,543	-582
2012	2,074	1,605	-469
2013	2,034	1,637	-397

Course of Indices for 2007 up to September 2013

Glossary

The Consumer Price Index and Inflation

The Consumer Price Index (CPI) measures changes in prices of consumer goods and services by households. Consumer price indices can be intended to measure either the rate of price inflation or deflation as perceived by households or changes in their cost of living. In case of inflation, the percentage change is positive and it indicates a decrease in the purchasing power of the consumers.

Monthly percentage change

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of the previous month.

Year-to-date (ytd)

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of December prior to the year under review.

End of period inflation (last 12 months)

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of the same month of the previous year.

Period average inflation (last 24 months)

The period average inflation is calculated by comparing the annual average CPI of the concerning period with the annual average CPI of the concerning period of the previous year.

Effect

Contribution of all percentage changes (of all respective aggregates) to the CPI.

Core inflation

Core inflation is a measure of inflation that excludes certain items which face volatile price movements. Core inflation eliminates the inflation of certain products that can have temporary price shocks because these shocks can diverge from the overall trend of inflation and give a false measure of inflation. The core rate of inflation is calculated by: total inflation excluding food and energy prices. In part, that is because the core is less volatile and reflects better the relationship of supply and demand in domestic product markets. The core usually is a better measure of the basic rate of inflation that will tend to emerge in the absence of supply shocks.

Food & catering services

The "Food & catering services" index is composed of the indices for the "Food & Non-alcoholic beverages" sector ("Food at home") and the "Catering services" ("Food away from home") category.

Subsistence level

The subsistence level is the minimum level of income which is perceived necessary to achieve an adequate standard of living in a given country. The subsistence level is usually determined by estimating the cost of all the essential resources that an average adult consumes in one month or year. This is commonly called a basic needs index, and varies according to the price of food, clothing, housing, transport and other items in the "basket". The subsistence level is monthly updated for inflation using the monthly CPI.
