HIGHLIGHTS

INTERNATIONAL MERCHANDISE TRADE FOR ARUBA: SECOND QUARTER 2002

The international merchandise trade of Aruba registers the flow of goods to and from the economic territory of Aruba. This territory of Aruba comprises the Free Zone Area of Aruba and the free circulation area of Aruba¹. Before 2000, the trade data was presented according to the Special Trade System². From 2000 on, the value of trade between the Free Zone Area of Aruba and the free circulation area of Aruba has been excluded from the total value of trade, enabling the CBS to present the trade data according to the General Trade System. In the second quarter of 2002 the following developments have been registered in the international merchandise flows of Aruba.

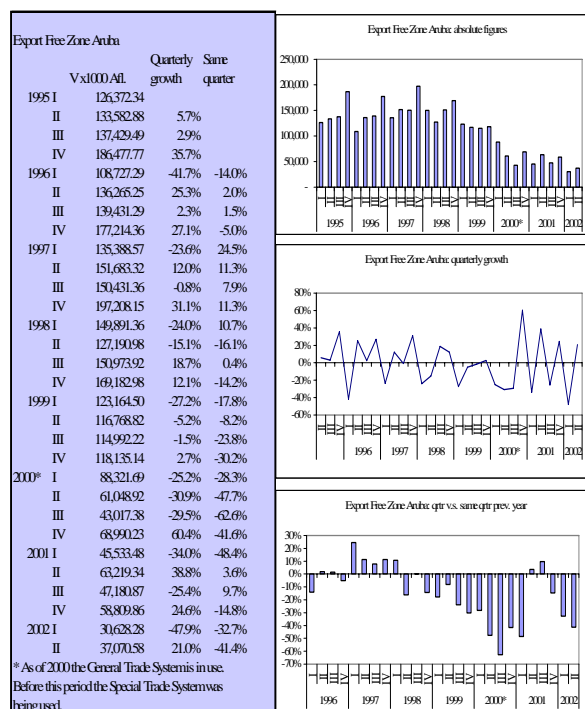

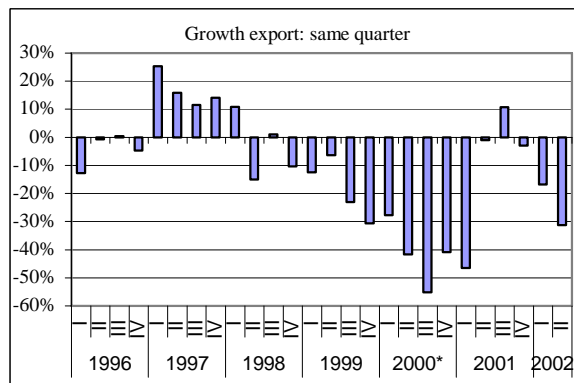

Trends in total import and export

During the second quarter of 2002 Aruba exported a total value of 52.1 million florins to the rest of the world. This represented a downfall of 31.2% compared to the same quarter of the previous year. The recent downfall in total export from Aruba is consistent to the trend that export has been showing for many quarters: with the exception of the third quarter of 2001, the total export from Aruba has been declining continuously since the fourth quarter of 1998. The trend in total export from Aruba is mainly caused by the dramatic declines in the value of exports from the Free Zone Aruba.

Total imports to Aruba showed no increase or decrease during the second quarter of 2002. The total value of import during this quarter was 344.2 million florins. The same level of total import to Aruba was registered during the second quarter of 2001.

Import and Export to the Free Zone of Aruba

Import and export to the Free Zone of Aruba are in line with the trend this area has been showing for the past quarters. Both flows registered a downfall in the second quarter of 2002. The value of import to the Free Zone of Aruba dropped by 28% as compared to the same quarter of the previous year, while the value of export from this same area dropped by 41.4%. The drop in imports was mainly due to a decrease in imports of food products.

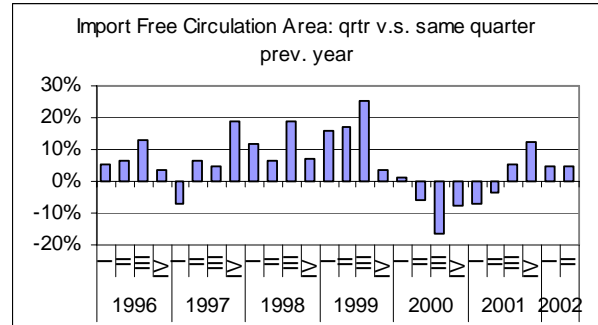

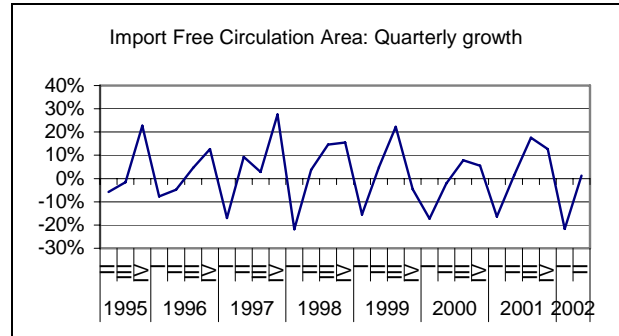

¹ The free circulation area of Aruba comprises the economic territory of Aruba, excluding the Free Zone Area.

² A description of Special Trade System and General Trade System is given on page 33.

³ Total import for Aruba is the sum of the quarterly inflows to the Free Zone Aruba and the free circulation area of Aruba. Although it is not logical to present total import under the Special Trade System due to possible double counting, it is done in the first graph for analytical purposes only.

Merchandise trade in the free circulation area of Aruba

In the second quarter of 2002 both import to as export from the free circulation area of Aruba increased for the fourth consecutive quarter as compared to the same quarter of the previous year. The value of import to this area in the second quarter of 2002 was 308,1 million florins, and represented an increase of 4.8% compared to the same quarter of 2001. The value of export from this area grew by 20% in the second quarter of 2002, reaching a level of 15 million florins. This increase is mainly due to exports of merchandise in the section of "Live animals and other animal products.

Preface

The 2002 Second Quarter Foreign Trade Publication of Aruba contains Import to Aruba, Import to Free Zone Aruba, Export from Aruba and Export from Free Zone Aruba. It also includes comparisons between the quarters of 2000, 2001 and 2002, while those should still be considered as provisional.

Recently the CBS developed a system in which it became possible to process the Foreign Trade data according to General Trade System.

For further inquiry on definitions and methodology we refer to the Aruba Foreign Trade Statistics Procedure and Definitions, which is available upon request at the Central Bureau of Statistics.

I. Explanatory Notes

1. Trade Data

The collection of data through Customs administration conform the automated Asycuda system of Aruba register all the documents "Enig Document". The customs department registers approximately 8000 documents per month. While we assumed that all existing documents are incorporated in the Asycuda system, CBS analysis shows that there are a good number of documents, which are lost only a part of which are recovered and with much delay. In order to report findings on a timely basis, it was decided to publish preliminary quarterly data. Possible corrections will be made in the annual FTS publication.

2. Trade Flows

CBS is utilizing the International General Trade System for the processing and publication of all import and export data by commodities and by country for the island of Aruba.*

Definitions:

The Customs Department also registers trade in and out of the bonded warehouses and freezones. Because of the importance of this type of trade for Aruba, we include these trade flow separately in the table wich we called tem Import to Aruba, Import to Free Zone Aruba added two additional tables,which we called Storage and Transit. All freezone transactions consisting of storage (Import to Free Zone Aruba) and transit (Export from Free Zone Aruba) are recorded using an S9 for storage of the goods into the warehouses and an E8 for the release of the goods out of the warehouses.

There are two types of movement at the free zone: S9 for goods that arrive from abroad and are stored and E4 for goods exported from Aruba into the freezone. These goods leave the freezone either as a transit good (E8) or a an import into Aruba (C48.). By definition, these transactions belong to the Special Trade as well as the General Trade. For many reasons, certain goods are excluded, such as monetary gold, securities, bank notes, coins in circulation and postal items; and goods consigned by a government to its armed forces and diplomatic representatives abroad including Embassies, Consulates, Kabinet van Nederlandse-Antilliaanse en Arubaans Zaken (KABNA), Kabinet of the Gouverner and Marinierskazerne . These goods are excluded from the foreign trade statistics according to United Nations recommendations. Certain commodities are also excluded from this publication because of specific statistical thresholds or lack of data, for example in the case of mineral fuels. Mineral products (section 5) consist of three categories of wich mineral fuels (categorie 27) is excluded. However, this product will be included in the near future.

3. Partner Countries

In the case of import, the partner country is the country of consignment or provenance from which goods are dispatched to Aruba without any commercial transaction in intermediate countries.

In case of export, the partner country is the country of destination known at the time of dispatchment as the final country to which goods are delivered.

The tables by country show the 10 most important countries of the trade value by section for each transaction type. These top countries represent the total transactions by Section

* Total Imports respectively Total Export include all goods entering respectively leaving the economic territory of Aruba. The economic territory of Aruba comprises Aruba (the free circulation area) and the Freezone Aruba. This is consistent with the General Trade System.

4. Commodity and Country classification

Asycuda covers 591 eight digit commodity codes. The first two digits of the code are universally recognize product codes. The remaining six digits further divide the categories into the specific commodities. For publication purposes, Aruba uses 21 sections to clearly organize these product groups. In the near future, the customs department of Aruba will adopt the Harmonized Trade system consisting of 6420 different commodity codes, leading to a much more detailed publication.

5. Values and Quantities

The value of the goods equals the value of the commodity at the place and time it crosses the border. The basis for valuation is cost, insurance & freight (c.i.f.) for import and free on board (f.o.b.) for export. All values are in thousands of Aruban Florins (\$1=Afl. 1.79) (V in Afl). Quantities are expressed as net weight in thousand of kilos W in kg). Blanks on values or quantities indicate that there was no transaction for that commodity code.

6. Publications

The quarterly Foreign Trade report contains global information on imports and exports of Aruba. This publication consists of:

- Quarterly imports and exports by Asycuda Sections
- Quarterly imports and exports by country and by Asycuda Sections

7. Tables and graphs

Definitions of tables are shown in the upper left-hand corner of each table. Definitions of graphs are shown above each graph.

**Annex 1: Asycuda Commodity Group Codes
Classification by Sections and Categories**

01. Live animals and other animal products

- 01.01 Live animals
