## II. Explanatory Notes

### 1. Trade Data

The collection of data through Customs administration conform the automated Asycuda system of Aruba register all the documents "Enig Document". The customs department registers approximately 8000 documents per month. While we assumed that all existing documents are incorporated in the Asycuda system, CBS analysis shows that there are a good number of documents, which are lost only a part of which are recovered and with much delay. In order to report findings on a timely basis, it was decided to publish preliminary quarterly data. Possible corrections will be made in the annual FTS publication.

### 2. Trade Flows

CBS is utilizing the International General Trade System for the processing and publication of all import and export data by commodities and by country for the island of Aruba.\*

#### Definitions:

The Customs Department also registers trade in and out of the bonded warehouses and freezones. Because of the importance of this type of trade for Aruba, we include these trade flow separately in the table wick we called them Import to Aruba, Import to Free Zone Aruba added two additional tables, which we called Storage and Transit. All freezone transactions consisting of storage (Import to Free Zone Aruba) and transit (Export from Free Zone Aruba) are recorded using an S9 for storage of the goods into the warehouses and an E8 for the release of the goods out of the warehouses.

There are two types of movement at the free zone: S9 for goods that arrive from abroad and are stored and E4 for goods exported from Aruba into the freezone. These goods leave the freezone either as a transit good (E8) or an import into Aruba (C48.). By definition, these transactions belong to the Special Trade as well as the General Trade. For many reasons, certain goods are excluded, such as monetary gold, securities, bank notes, coins in circulation and postal items; and goods consigned by a government to its armed forces and diplomatic representatives abroad including Embassies, Consulates, Kabinet van Nederlandse-Antilliaanse en Arubaans Zaken (KABNA), Kabinet of the Governer and Marinierskazerne. These goods are excluded from the foreign trade statistics according to United Nations recommendations. Certain commodities are also excluded from this publication because of specific statistical thresholds or lack of data, for example in the case of mineral fuels. Mineral products (section 5) consist of three categories of wick mineral fuels (categorie 27) is excluded. However, this product will be included in the near future.

### 3. Partner Countries

In the case of import, the partner country is the country of consignment or provenance from which goods are dispatched to Aruba without any commercial transaction in intermediate countries.

In case of export, the partner country is the country of destination known at the time of dispatchment as the final country to which goods are delivered.

The tables by country show the 10 most important countries of the trade value by section for each transaction type. These top countries represent the total transactions by Section

\* Total Imports respectively Total Export include all goods entering respectively leaving the economic territory of Aruba. The economic territory of Aruba comprises Aruba (the free circulation area) and the Freezone Aruba. This is consistent with the General Trade System.

#### **4. Commodity and Country classification**

Asycuda covers 591 eight digit commodity codes. The first two digits of the code are universally recognize product codes. The remaining six digits further divide the categories into the specific commodities. For publication purposes, Aruba uses 21 sections to clearly organize these product groups. In the near future, the customs department of Aruba will adopt the Harmonized Trade system consisting of 6420 different commodity codes, leading to a much more detailed publication.

#### **5. Values and Quantities**

The value of the goods equals the value of the commodity at the place and time it crosses the border. The basis for valuation is cost, insurance & freight (c.i.f.) for import and free on board (f.o.b.) for export. All values are in thousands of Aruban Florins (\$1=Afl. 1.79) (V in Afl). Quantities are expressed as net weight in thousand of kilos W in kg). Blanks on values or quantities indicate that there was no transaction for that commodity code.

#### **6. Publications**

The quarterly Foreign Trade report contains global information on imports and exports of Aruba. This publication consists of:

- Quarterly imports and exports by Asycuda Sections
- Quarterly imports and exports by country and by Asycuda Sections

#### **7. Tables and graphs**

Definitions of tables are shown in the upper left-hand corner of each table. Definitions of graphs are shown above each graph.
