## Special Remarks

**The population figures**, presented, are based on two sources:

- 1. The population censuses that were held in 1981, 1991 and 2000 and
- 2. The mutations in the population register, due to birth, death, marriage, divorce domiciliation and departure.

**At the bottom of each table**, the source of the data is indicated. The Population Censuses of 1981, 1991 and 2000 showed discrepancies with the population figures presented by the Registry Office. In both instances, there were more persons registered than counted during the Population Censuses. The discrepancies between the two sources are mainly due to underreporting of departure at the Population Registry Office. The Central Bureau of Statistics uses a statistical method to make corrections for the errors in the reported migration figures.

**Individual figures** in tables do not necessarily add to totals, because of rounding. Money figures are quoted in Aruban Florins (Afls.), unless otherwise stated. Revised figures are not marked as such.

### **Danger categories health insurance:**

### **General Trade System (since year 2000)**

*General Imports* : the combined total of imports both for direct domestic consumption and into bonded warehouses or Free Zones.

*General Exports* : the combined total of national exports and re-exports of nationalized goods.

*Re-exports* : the outward movement of nationalized goods plus goods that move outward in their unaltered state after having been imported from bonded warehouses or Free Zones.

### **Special Trade System**

*Special Imports*: the combined total of imports both for direct domestic consumption and for transformation repair. It also registers the withdrawals from bonded warehouses and/or Free Zones for domestic consumption.

*Special Exports* : the combined total of exports of national merchandise wholly or partially produced or manufactured in the country and the export of goods included in special imports and then exported in their unaltered state.

*Temporary Import and Temporary Export (Direct Transit)* : goods merely being transshipped or moving through the country for purposes of transport only.

**Nominal GDP** = the total market value of goods and services produced in Aruba after deducting the cost of goods and services utilized in the process of production, but before deducting allowances for the consumption of fixed capital.

**Real GDP** = total market value of goods and services produced by domestic factors of production annually, adjusted to remove the impact of price changes.

### **Consumer Price Index**

The Consumer Price Index (C.P.I.) measures changes in the level of consumer prices of goods and services over time. The C.P.I. can be used amongst others to measure inflation; for indexation by the government, e.g. taxes, pensions salaries, etc.; for inflation accounting; for deflation of National Accounts, in order to arrive at constant - prices.

Statistics on the C.P.I. have been compiled for Aruba since 1958.

At present the C.B.S. compiles a general consumer price index, but also C.P.I.'s for both the lower income and higher income groups of the population.
