## Preface

Publication\* about the Fourth Quarter of Foreign Trade in Aruba contains information on Import to Aruba, Import to Free Zone Aruba, Export from Aruba and Export from Free Zone Aruba. It includes comparisons between the years 2010 till 2012 and for the quarters of 2013 and 2014. The figures pertaining to 2011 till 2014 should still be considered as provisional, while the trade statistics series for 2010 are final. The CBS developed a system in which it became possible to process the Foreign Trade data according to General Trade System.

The 1st of March 2014, the Customs Department implemented a new programme that reformed the Customs clearance process, "ASYCUDA" (Automated SYstem for CUstoms DATay). This is a computerized customs management system designed by UNCTAD to assist customs authorities all over the world to automate and control their core processes. This system takes into account the international Harmonized Commodity Description, coding System (generally referred to as "Harmonized System or simply "HS") and standards developed by ISO (International Organization for Standardization), WCO (World Customs Organization) and the United Nations. It also generates trade data that can be used for statistical economic analysis and which can support government projections and planning.

The system is used by more than 170 countries and economies as a basis for their Customs tariffs and for the collection of international trade statistics. Over 98 % of the merchandise in international trade is classified in terms of the HS. The Harmonized System comprises of 97 Chapters and is arranged in 21 Sections. The pattern of arrangement of goods in the HS is in the increasing degree of manufacture: raw materials, unworked products, semi-finished products, finished products. The HS is thus a universal economic language and code for goods, and an indispensable tool for international trade.

Since January 2009, the CBS processed trade data according to the Harmonized System. In order to facilitate comparisons in time, a link was established between the ASYCUDA-classification and the Harmonized System.

Since the introduction of the Harmonized system codification, in 2009, we tried to publish part of the trade in mineral fuels. Finally it has become possible to publicize part of the mineral fuels import and export going back to 2009. For the Import Trade Elements of Mineral fuels are still excluded "crude oil & butane" and for Export Elements of Mineral fuels are also still excluded: "crude oil, kerosene, gasoline, gas, propane & butane". Before the year 2009 all mineral fuels were excluded.

A special thanks goes to our data-supplier and supporter, namely the department of Duty and Taxes.

For further inquiry on definitions and methodology we refer to the Aruba Foreign Trade Statistics Procedure and Definitions, which is available upon request at the Central Bureau of Statistics.

The Central Bureau of Statistics hopes that this publication will provide all the users with the necessary information. For comments and further information, feel free to contact us.

The Chairman of the Central Bureau of Statistics Management Team  
Mr. Marlon Faarup

Oranjestad, May 2015

**\*Based on additional information that became available to the CBS posteriorly to compiling the trade statistics, the import data for the year 2014 was adjusted accordingly in this edition. Specifically, the import was reduced in the second and third quarters of 2014 since originally filed imports by importers were eventually reported cancelled at a later date. This was due to the introduction of the new automated system of the Custom Department since the second quarter of 2014.**

## II. Explanatory Notes

### 1. Trade Data

The collection of data through Customs administration conform ASYCUDA is a computerized customs management system which covers most foreign trade procedures. The system handles manifests and customs declarations, accounting procedures, and warehousing manifest and suspense procedures. The programme registers approximately 10.000 documents per month. CBS analysis shows that some documents were lost and later part of them were recovered with a delay. In order to report findings on a timely basis, it was decided to publish preliminary quarterly data. Possible corrections will be made in the annual FTS publication.

### 2. Trade Flows

CBS is utilizing the International General Trade System for the processing and publication of all import and export data by commodities and by country for the island of Aruba.\*

#### Definitions:

The Customs Department also registers trade in and out of the bonded warehouses and freezones. Because of the importance of this type of trade for Aruba, we include these trade flow separately in the table which we called them Import to Aruba, Import to Free Zone Aruba added two additional tables, which we called Storage and Transit. All freezone transactions consisting of storage (Import to Free Zone Aruba) and transit (Export from Free Zone Aruba) are recorded using an S9 for storage of the goods into the warehouses and an E8 for the release of the goods out of the warehouses.

There are two types of movement at the free zone: S9 for goods that arrive from abroad and are stored and E4 for goods exported from Aruba into the freezone. These goods leave the freezone either as a transit good (E8) or an import into Aruba (C48.). By definition, these transactions belong to the Special Trade as well as the General Trade. For many reasons, certain goods are excluded, such as monetary gold, securities, bank notes, coins in circulation and postal items; and goods consigned by a government to its armed forces and diplomatic representatives abroad including Embassies, Consulates, Kabinet van Nederlandse-Antilliaanse en Arubaans Zaken (KABNA), Kabinet of the Governor and Marinierskazerne. These goods are excluded from the foreign trade statistics according to United Nations recommendations. Certain commodities are also excluded from this publication because of specific statistical thresholds or lack of data. In the former Asycuda, Mineral products (section 5) consist of three categories of which mineral fuels (category 27) are still excluded until December 2008. Since the introduction of the Harmonized system codification, in 2009, we tried to publish part of the trade in mineral fuels. Finally it has become possible to publicize part of the elements of mineral fuels for import still excluded are "crude oil & butane" and for export still excluded are "crude oil, kerosene, gasoline, gas, propane & butane".

### 3. Partner Countries

In the case of import, the partner country is the country of consignment or provenance from which goods are dispatched to Aruba without any commercial transaction in intermediate countries.

In case of export, the partner country is the country of destination known at the time of dispatchment as the final country to which goods are delivered.

The tables by country show maximal the 12 most important countries of the trade value by section for each transaction type. These top countries represent the total transactions by Section

\* Total Imports respectively Total Export include all goods entering respectively leaving the economic territory of Aruba. The economic territory of Aruba comprises Aruba (the free circulation area) and the Free Zone Aruba. This is consistent with the General Trade System.

#### **4. Commodity and Country classification**

Harmonized System for Aruba covers 5914 eight digit commodity codes. The first two digits of the code are universally recognize product codes. The remaining six digits further divide the categories into the specific commodities. For publication purposes, Aruba uses 21 sections to clearly organize these product groups. Until december 2008, the Asycuda coding system was used by the Customs department of Aruba.

#### **5. Values and Quantities**

The value of the goods equals the value of the commodity at the place and time it crosses the border. The basis for valuation is cost, insurance & freight (c.i.f.) for import and free on board (f.o.b.) for export. All values are in thousands of Aruban Florins (\$1=Afl. 1.79) (Vx1000 Afl) quantities are expressed as net weight in thousand of kilos (Wx1000 kg). Blanks on values or quantities indicate that there was no transaction for that commodity code.

#### **6. Publications**

The quarterly Foreign Trade report contains global information on imports and exports of Aruba. This publication consists of:

- Quarterly imports and exports by Harmonized Sections
- Quarterly imports and exports by country and by Harmonized Sections
