Figure 1 Population 2010-2014 change by age and sex

As of the end of 2014 the estimated population totaled 107,159 persons, showing a slowdown in the growth rate as seen during the first quarters of the last two years. Between 2012 and 2014, the net growth rate in the first quarter of each year decreased from 6.2 per thousand population in 2012, to 5.2 per 1,000 in 2013 and 3.4 per 1,000 in 2014.

The number of births and deaths do not make an impact in the population growth as do the decrease in number of persons migrating to Aruba and the increase in the number of persons leaving the island. The net migration during the first quarter of 2011 was of 248 persons, reaching 534 in 2012, and gradually decreasing again to 246 during the first quarter of 2014.

Consistently the majority of migrants are foreign-born people. However comparing the first quarters of the last 4 years, their share decreased from 72.7 percent of all migrants in 2011 to 67.9 percent in 2014. The opposite trend is seen in those who leave the island.

During the first quarters of the last 4 years, the share of foreign-born persons, of all those leaving the island, increased from 46.3 percent in the first quarter of 2011 to 59.5 percent in the first quarter of 2014. However, over a one year period a slight majority of those leaving the island are still Aruban-born.
