Preface

The 2013 fourth quarter Foreign Trade Publication of Aruba contains information on Import to Aruba, Import to Free Zone Aruba, Export from Aruba and Export from Free Zone Aruba. It includes comparisons between the years 2009 till 2011 and over the quarters of 2012 and 2013. The figures pertaining to 2010 till 2013 should still be considered as provisional, while the trade statistics series for 2009 are final. The CBS developed a system in which it became possible to process the Foreign Trade data according to General Trade System.

The 8th of May 2008, the Customs Department switched from the ASYCUDA- system to the Harmonized Commodity Description and Coding System – commonly known as the Harmonized System or HS. This is an internationally standardized nomenclature for the description, classification and coding of goods. It is developed and maintained by the World Customs Organization (WCO), formerly known as the Customs Co-operation Council.

Currently over 200 countries and customs or economic unions use the Harmonized System as the basis for customs tariffs and for the compilation of international trade statistics. The Harmonized System comprises of 97 Chapters and is arranged in 21 Sections. The pattern of arrangement of goods in the HS is in the increasing degree of manufacture: raw materials, unworked products, semi-finished products, finished products.

From January 2009, the CBS will process trade data according to the Harmonized System. In order to facilitate comparisons in time, a link was established between the ASYCUDA-classification and the Harmonized System.

Since the introduction of the Harmonized system codification, in 2009, we tried to publish part of the trade in mineral fuels. Finally it has become possible to publicize part of the mineral fuels import and export going back to 2009. For the Import Trade Elements of Mineral fuels are still excluded "crude oil & butane" and for Export Elements of Mineral fuels are still excluded "crude oil, kerosene, gasoline, gas, propane & butane". Before the year 2009 all mineral fuels were excluded

A special thanks goes to our data-supplier and supporter, namely the department of Duty and Taxes.

For further inquiry on definitions and methodology we refer to the Aruba Foreign Trade Statistics Procedure and Definitions, which is available on the Central Bureau of Statistics website (www.cbs.aw/standards/classification/).

The Central Bureau of Statistics hopes that this publication will provide all users with the necessary information. For comments and further information, feel free to contact us.

Import to Aruba, Free Zone Aruba and Export from Aruba, Free Zone Aruba Tables and Graphs By Section and Country

Excluding mineral fuels

II. Explanatory Notes

1. Trade Data

The collection of data through Customs administration conform the automated Harmonized System of Aruba register all the documents "Enig Document". The customs department registers approximately 8500 documents per month. While we assumed that all existing documents are incorporated in the Harmonized System, CBS analysis shows that there are a good number of documents, which are lost only a part of which are recovered and with much delay. In order to report findings on a timely basis, it was decided to publish preliminary quarterly data. Possible corrections will be made in the annual FTS publication.

2. Trade Flows

CBS is utilizing the International General Trade System for the processing and publication of all import and export data by commodities and by country for the island of Aruba.*

Definitions:

The Customs Department also registers trade in and out of the bonded warehouses and freezones. Because of the importance of this type of trade for Aruba, we include these trade flow separately in the table wicth we called them Import to Aruba, Import to Free Zone Aruba added two additional tables, which we called Storage and Transit. All freezone transactions consisting of storage (Import to Free Zone Aruba) and transit (Export from Free Zone Aruba) are recorded using an S9 for storage of the goods into the warehouses and an E8 for the release of the goods out of the warehouses.

There are two types of movement at the free zone: S9 for goods that arrive from abroad and are stored and E4 for goods exported from Aruba into the freezone. These goods leave the freezone either as a transit good (E8) or an import into Aruba (C48.). By definition, these transactions belong to the Special Trade as well as the General Trade. For many reasons, certain goods are excluded, such as monetary gold, securities, bank notes, coins in circulation and postal items; and goods consigned by a government to its armed forces and diplomatic representatives abroad including Embassies, Consulates, Kabinet van Nederlandse-Antilliaanse en Arubaans Zaken (KABNA), Kabinet of the Governer and Marinierskazerne. These goods are excluded from the foreign trade statistics according to United Nations recommendations. Certain commodities are also excluded from this publication because of specific statistical thresholds or lack of data. In the former Asycuda, Mineral products (section 5) consist of three categories of which mineral fuels (category 27) are still excluded untill december 2008. Since the introduction of the Harmonized system codification, in 2009, we tried to publish part of the trade in mineral fuels. Finally it has become possible to publicize part of the elements of mineral fuels for import still excluded are "crude oil & butane" and for export still excluded are "crude oil, kerosene, gasoline, gas, propane & butane".

3. Partner Countries

In the case of import, the partner country is the country of consignment or provenance from which goods are dispatched to Aruba without any commercial transaction in intermediate countries.

In case of export, the partner country is the country of destination known at the time of dispatchment as the final country to which goods are delivered.

The tables by country show the 10 most important countries of the trade value by section for each transaction type. These top countries represent the total transactions by Section

* Total Imports respectively Total Export include all goods entering respectively leaving the economic territory of Aruba. The economic territory of Aruba comprises Aruba (the free circulation area) and the Freezone Aruba. This is consistent with the General Trade System.

4. Commodity and Country classification

Harmonized System for Aruba covers 5507 eight digit commodity codes. The first two digits of the code are universally recognize product codes. The remaining six digits further divide the categories into the specific commodities. For publication purposes, Aruba uses 21 sections to clearly organize these product groups. Until december 2008, the Asycuda coding system was used by the Customs department of Aruba.

5. Values and Quantities

The value of the goods equals the value of the commodity at the place and time it crosses the border. The basis for valuation is cost, insurance & freight (c.i.f.) for import and free on board (f.o.b.) for export. All values are in thousands of Aruban Florins (\$1=Afl. 1.79) (Vx1000 Afl) quantities are expressed as net weight in thousand of kilos (Wx1000 kg). Blanks on values or quantities indicate that there was no transaction for that commodity code.
