

Foreign Trade Statistics 2012-2016

Trade and industry

Preface

The Foreign Trade Statistics (FTS), 2012-2016, publication contains information on Imports to Aruba, Imports to the Free Zone Aruba, Exports from Aruba and Exports from the Free Zone Aruba. Comparisons are made for the quarters of 2015 and 2016 and should still be considered as provisional. The CBS developed a system which made it possible to process the Foreign Trade data according to General Trade System.

The 1st of March 2014, the Customs Department implemented a new program that reformed the Customs clearance process, "ASYCUDA" (Automated SYstem for CUstoms DATay). This is a computerized customs management system designed by UNCTAD to assist customs authorities all over the world to automate and control their core processes. This system takes into account the international Harmonized Commodity Description, coding System (generally referred to as "Harmonized System or simply "HS") and standards developed by ISO (International Organization for Standardization), WCO (World Customs Organization) and the United Nations. It also generates trade data that can be used for statistical economic analysis and which can support government projections and planning.

The system is used by more than 170 countries and economies as a basis for their Customs tariffs and for the collection of international trade statistics. Over 98 % of the merchandise in international trade is classified in terms of the HS. The Harmonized System comprises of 97 Chapters and is arranged in 21 Sections. The pattern of arrangement of goods in the HS is in the increasing degree of manufacture: raw materials, unworked products, semi-finished products, finished products. The HS is thus a universal economic language and code for goods, and an indispensable tool for international trade.

Since January 2009, the CBS has been processing trade data according to the Harmonized System. In order to facilitate comparisons in time, a link was established between the ASYCUDA-classification and the Harmonized System. Since the introduction of the Harmonized system codification, in 2009, it has become possible to publish part of the mineral fuels import and export. Import of Crude oil and butane is excluded from the trade elements of mineral fuels. The export of crude oil, kerosene, gasoline, gas, propane and butane is also excluded from the trade elements of mineral fuels. Before 2009 all mineral fuels were excluded.

Special thanks go to our data-supplier and supporter, namely the department of Duty and Taxes.

For further inquiry on definitions and methodology we refer to the Aruba Foreign Trade Statistics Procedure and Definitions, which is available upon request at the Central Bureau of Statistics.

The Central Bureau of Statistics trusts that this publication will provide all the users with relevant information. For comments and further information, feel free to contact us.

A note to the reader

The following report presents the trade statistics for the year of 2016.

- Due to lack of information in the fourth quarter of 2016, the weight and value of some components of mineral products are derived from the actual amount of excises and import duties paid and an interpolated average estimate based on past actual outcomes.
- Import to the free circulation area of Aruba, in terms of value, registered a decrease of 2.5% in the year of 2016 (Afl. 1,918.0 mln) compared to the same period in 2015 (Afl. 1,967.0 mln). The largest decrease is seen for the section "Mineral products" (Afl. -24.7 mln), which was caused by a decrease in the category "Petrochemical products" (Afl. -25.8 mln). The largest increase is observed for the section "Transport equipment" (Afl. 11.5 mln), which was mainly caused by an increase in the category "Cars, motorcycles and cycles" (Afl. 9.5 mln).
- Export from the free circulation area of Aruba, in terms of value, registered an increase of 41.1% in the year of 2016 (Afl. 82.0 mln) compared to the same period in 2015 (Afl. 58.1 mln). The largest increase is seen for the section "Real pearls (natural) and other precious stones" (Afl. 7.4 mln), which was mainly caused by an increase in the category "Pearls, precious stones and coins" (Afl. 7.4 mln). The largest decrease is observed for the section "Transport equipment" (Afl. -3.6 mln), which was caused by a decrease in the category "Navigation" (Afl. -2.7 mln).

This report is divided in 7 sections. An overview of the total imports and exports of goods to and from Aruba and by large and other companies is presented in section A. Sections B and E provides the total imports and exports by "sections". The imports and exports by type of transportation and by region is indicated in sections C and F. Sections D and G presents the total imports and exports by country and by sections.

Imports to Aruba and Free Zone Aruba & Exports from Aruba and Free Zone Aruba

II. Explanatory Notes

1. Trade Data

The collection of data through Customs administration conform ASYCUDA is a computerized customs management system which covers most foreign trade procedures. The system handles manifests and customs declarations, accounting procedures, and warehousing manifest and suspense procedures. The program registers approximately 10.000 documents per month. In order to report findings on a timely basis, the CBS publishes preliminary quarterly data. The revised data will be published in the annual FTS publication.

2. Trade Flows

CBS is utilizing the International General Trade System for the processing and publication of all import and export data by commodities and by country for the island of Aruba.¹

There are two types of movements at the free zone: S9 for goods that arrive from abroad and are stored and E4 for goods exported from Aruba into the free zone. These goods leave the free zone either as a transit good (E8) or an import into Aruba (C48.). By definition, these transactions belong to the Special Trade as well as the General Trade. For many reasons, certain goods are excluded, such as monetary gold, securities, bank notes, coins in circulation and postal items; and goods consigned by a government to its armed forces and diplomatic representatives abroad including Embassies, Consulates, Kabinet van Nederlandse-Antilliaanse en Arubaans Zaken (KABNA), Kabinet of the Governor and Marinierskazerne. These goods are excluded from the foreign trade statistics according to United Nations recommendations. Certain commodities are also excluded from this publication because of specific statistical thresholds or lack of data. Since the introduction of the Harmonized system codification, in 2009, it has become possible to publish part of the mineral fuels (category 27) import and export. Import of Crude oil and butane is excluded from the trade elements of mineral fuels. The export of crude oil, kerosene, gasoline, gas, propane and butane is also excluded from the trade elements of mineral fuels. Before 2009 all mineral fuels were excluded.

3. Partner Countries

In the case of import, the partner country is the country of consignment or provenance from which goods are dispatched to Aruba without any commercial transaction in intermediate countries. In case of export, the partner country is the country of final destination known at the time of dispatching the goods. The tables by country show the most important countries of the trade value by section for each transaction type for the current quarter. These top countries represent the total transactions by Section.

4. Commodity and Country classification

The Harmonized System for Aruba covers 5914 eight digit commodity codes. The first two digits of the code are universally recognized product codes. The remaining six digits further divide the categories into the specific commodities. For publication purposes, Aruba uses 21 sections to clearly organize these product groups. Until December 2008, the Asycuda coding system was used by the Customs department of Aruba.

5. Values and Quantities

The value of the goods equals the value of the commodity at the place and time it crosses the border. The basis for valuation is cost, insurance & freight (c.i.f.) for import and free on board (f.o.b.) for export. All values are in thousands of Aruban Florins (\$1=Afl. 1.79) (Vx1000 Afl) and quantities are expressed as net weight in thousands of kilos (Wx1000 kg). Blanks on values or quantities indicate that there was no transaction for that commodity code.

6. Tables

Definitions of tables are shown in the upper left-hand corner of each table.

7. Large companies

Large companies refers to the following companies: Valero, Arugas, Web, Elmar and Setar

8. Air-transport

All transactions taking place at the custom office at the airport are considered as "air-transport".

¹ Total Imports and Total Exports include all goods entering or leaving the economic territory of Aruba, respectively. The economic territory of Aruba comprises Aruba (the free circulation area) and the Free Zone Aruba. This is consistent with the General Trade System.
