Graph 1. Population change 2010-2017

Keeping an accurate and reliable population registry is one of the responsibilities of the Population and Civil Registry Office (DBSB). The population registry is supposed to consist of those who have actual residency in Aruba. Any improperly recorded data or any wrongly registered person has financial implications for Aruba in general and in particular for its social funds. It is therefore important that the population registry is kept accurate and reliable.

A collaboration between the DBSB, the AZV and IASA, resulted in a list of 11,929 persons whose actual residency needed verification. Starting late 2016, the DBSB launched the project "Opschonen van het bevolkingsregister van de DBSB", with the main objective to update the population registry. Ultimately, those whose residency in Aruba could not be verified, will be de-registered from the Population Registry.

Other than reduce the current discrepancy of 8,720 persons between the estimated population by the CBS and the registered population at the DBSB (see Table 2), the data cleaning at the DBSB will have no implications on the population estimates made by the CBS.
