A note to the reader

The following report presents the price statistics for August 2017.

- At the end of August 2017 the Consumer Price Index (CPI) shows a decrease of 0.2% compared to the end of July 2017. The sector which affected the CPI the most was “Recreation and culture” (-2.7%), which led to an effect of -0.22 percentage points (ppts) on the Δ CPI of August 2017 (-0.2%).
- Compared to August 2016 the CPI decreased by 0.7%. The sector which affected the CPI the most was “Housing” (-3.0%). Specifically, the price of “Electricity, gas and other fuels” decreased by 13.6% and caused an effect of -1.22 ppts on the end of period inflation of August 2017 (-0.7%).
- The period average inflation for the period August 2016 - August 2017 is -0.4%, which is 0.5 ppts higher compared to the period average inflation for the period August 2015 - August 2016 (-0.9%).
- Utilities (Water and Electricity) did not register price changes in August 2017. The price of gasoline increased by 2.5% and caused an effect of 0.13 ppts. The price of diesel registered an increase of 3.7% in August 2017 and had an effect of 0.01 ppt on the Δ CPI of August 2017 (-0.2%).

This report is divided in 7 sections. An overview of the monthly percentage changes in the CPI and index per sector is presented in section 1. Section 2 provides the yearly percentage changes in the CPI and index per sector. The development of indices of main sectors and utilities is outlined in section 3. Section 4 presents the percentage change in the CPI of Aruba’s major trading partners and compares the CPI of Aruba and the USA. Section 5 presents an overview of the monthly and yearly percentage changes of the core inflation. Section 6 presents the price movements in food & catering services. The development of the subsistence level is presented in section 7 and is followed by the appendices.

1 Monthly change of the CPI

1.1 CPI and Inflation

The CPI of the total population of Aruba for the month of August 2017 is 116.32; a decrease of 0.2% compared to the CPI of July 2017 (116.55). An overview of the percentage change in the CPI (Δ CPI) for different periods during 2016 and 2017 is shown in Table 1. The terms percentage change in the CPI and “inflation” (deflation) are considered similar and are used interchangeably. The deflation over the last 12 months (end of period inflation) is 0.7%, while the deflation over a period of 24 months (period average inflation) is 0.4%.

Table 1: Overview of Δ CPI

Period	2017	2016	Current	Last
Monthly Jul - Aug	-0.2	-0.6	116.32	116.55
Year-to-date Dec - Aug	-1.4	-1.0	116.32	118.00
Last 12 months ¹ Aug - Aug	-0.7	-1.4	116.32	117.17
Last 24 months ² Aug - Aug	-0.4	-0.9	116.94	117.37

Source: Central Bureau of Statistics Aruba

¹ End of period inflation

² Period average inflation

Figure 1 depicts the monthly Δ CPI over a period of one year starting from August 2016, whereas the Δ CPI for the month August for the years 2008 to 2017 is illustrated in Figure 2.

1.2 Changes in sector

Figure 3 provides an overview of the percentage changes for the indices per sector for August 2017. The percentage change in index is further denoted as Δ I. The largest Δ I is observed for the sector “Recreation and culture” with a decrease of 2.7%.

1.3 Changes in categories and subcategories

The largest positive and negative Δ I is seen in the categories “Newspapers, books and stationery” (4.8%) and “Holidays” (-22.2%). In the “Food and non-alcoholic beverages” sector a decrease of 0.2% is observed for the category “Food”, while the “Non-alcoholic beverages” category registered a decrease of 0.1% in August. In the “Transport” sector the major Δ I is observed for the category “Transport services” (-8.7%), mainly caused by a decrease in “Plane tickets” (-11.8%). In the “Recreation and culture” sector the major Δ I is observed for the category “Holidays” (-22.2%)¹.

The categories which influenced the CPI calculation the most are “Holidays”, “Operation of personal transport equipment” and “Transport services”, which had an effect of respectively, -0.22, 0.15 and -0.13 pts on the Δ CPI. Reference is made to tables 16 and 17 in Appendices 1 and 2. Table 16 provides an overview of the indices for the months August 2016, December 2016, July

2017 and August 2017 together with corresponding weights per sector and the monthly, end of period and period average percentage changes for August 2017. In table 17 an overview of the effect on the monthly, end of period and period average CPI per sector and category for August 2017 is presented. The course of indices for 2010 – up to August 2017 is illustrated in Appendix 5.

Figure 1: Monthly Δ CPI, 2016 - 2017

Figure 2: Monthly Δ CPI for August, 2008 - 2017

Figure 3: Δ I per sector, August 2017

¹ The focus is on the four major sectors which are: Housing, Transport, Food and non-alcoholic beverages and Recreation and culture. Together these sectors form 64% of the total weight of the basket of goods and services.

2 End of period change of the CPI

2.1 End of period change CPI for August 2017

The CPI decreased from 117.17 in August 2016 to 116.32 in August 2017, a decrease of 0.7%. This Δ CPI is the third lowest registered over a period of 5 years for the month August, and is 0.7 ppts higher than the Δ CPI registered in 2016 (-1.4%) (see table 2).

Table 2: End of period Δ CPI for August, 2013 - 2017

Period	Δ CPI	Index
2012-2013	-1.1	117.50
2013-2014	0.4	118.01
2014-2015	0.7	118.83
2015-2016	-1.4	117.17
2016-2017	-0.7	116.32

Source: Central Bureau of Statistics Aruba

2.2 Changes in sector

An overview of the percentage change per sector over the period August 2016 - August 2017 is presented in table 3. The largest Δ I is observed for the sector "Education" with an increase of 8.4%. Furthermore, decreases of 3.0%, 2.5% and 1.0% are observed for the "Housing", "Recreation and culture" and "Communications" sectors, respectively. A comparison of the Δ I's for the years 2016 and 2017 is provided in figure 4.

Table 3: Percentage change for August, 2016 - 2017

Sector	% Change
Food and non-alcoholic beverages	1.2
Alcoholic beverages and tobacco	0.8
Clothing and footwear	1.5
Housing	-3.0
Household operation	-0.3
Health	0.0
Transport	0.4
Communications	-1.0
Recreation and culture	-2.5
Education	8.4
Restaurants and hotels	1.4
Miscellaneous goods and services	-0.2
CPI	-0.7

Source: Central Bureau of Statistics Aruba

2.3 Changes in categories

The largest positive and negative Δ I in categories observed over a period of one year are respectively, "Tertiary education" (48.4%) and "Electricity, gas and other fuels" (-13.6%). For an overview of the end of period percentage changes per category refer to table 16 in Appendix 1.

Figure 4: Δ I per sector for August, 2016 - 2017

2.4 End of year change CPI 2008 - 2017

The end of year Δ CPI for the period 2008 - 2017 is shown in figure 5. The Δ CPI for 2017 is calculated by comparing the CPI of August 2017 with the CPI of December 2016. At the end of each year, the end of year percentage change equals the ytd Δ CPI. The ytd Δ CPI for August 2017 is -1.4%.

Figure 5: End of year Δ CPI 2008 - 2017

2.5 Period average change CPI for August 2017

The period average change CPI (Δ ACPI) for August 2017 is -0.4%. Table 4 provides an overview of the Δ ACPI for the month August for the years 2013 to 2017. The Δ ACPI for 2017 increased by 0.5 ppts compared to 2016.

Table 4: Overview of Δ ACPI for August, 2013 - 2017

Period	Δ ACPI	Index
2012-2013	-3.0	117.64
2013-2014	-0.3	117.26
2014-2015	1.0	118.49
2015-2016	-0.9	117.37
2016-2017	-0.4	116.94

Source: Central Bureau of Statistics Aruba

3 Development of indices of main sectors and utilities

3.1 Indices main sectors

The four major sectors, “Housing”, “Transport”, “Food and non-alcoholic beverages” and “Recreation and culture”, constitute 64% of the total weight of the basket of goods and services, which are observed on a monthly basis. An overview of the course of indices for 2009 – up to August 2017 per sector and for the CPI is provided in figures 9-1 to 9-12 in Appendix 5.

Changes in the indices of the sectors “Housing” and “Transport” are mainly the result of changes in the international oil prices and prices of utilities during the respective months. The development of crude oil, fuel surcharge, electricity, water, gasoline and diesel prices is provided in table 5 and in the adjoining figures 6-1 and 6-2.

Table 5: Prices of utilities, gasoline and diesel, 2015 - 2016

Month	Crude oil per barrel ¹	Fuel surcharge ² ≤ 500 kWh	Fuel surcharge ² 501-1000 kWh	Electricity ³	Water ⁴	Gasoline ⁵	Diesel ⁵

¹ Average West Texas Intermediate (WTI) crude oil price per barrel in US\$ (Source: U.S. Energy Information Administration)

² Fuel surcharge in Afl. cents per kWh

³ Electricity price in Afl.

⁴ Water price in Afl.

⁵ Gasoline and diesel prices in Afl. cents per liter

3.2 Electricity

The price of electricity is determined in Aruban florins (Afl.) for an average usage by households. The average usage is 725.5 kWh per month. The electricity price for an average consumption of 725.5 kWh did not change in August 2017, it remained at Afl. 265.65. Figure 6-1 provides an overview of the course of changes in the electricity price for the period 2011 to 2017.

The component in the electricity tariff which is sensitive to price changes is the fuel surcharge (brandstofclausule). Fuel surcharge for a usage of electricity up to 500 kWh surcharge did not change in August 2017, it stayed at Afl. 16.02 cents per kWh. Fuel surcharge for a usage of electricity between 501 - 1000 kWh did not change in August 2017, it stayed at Afl. 21.72 cents per kWh.

3.3 Water

The price of water is determined in Afl. for an average usage (water consumption) by households. Figure 6-1 provides an overview of the course of changes in the water price for the period 2011 to 2017. The water price for an average usage by households did not change in August 2017, it remained at Afl. 137.05.

3.4 Gasoline and Diesel

The retail price of gasoline increased by 2.5% from 173.2 cents per liter in July 2017 to 177.6 cents per liter in August 2017. In August 2017, the retail price of diesel registered an increase of 3.7% from 136.6 cents per liter in July 2017 to 141.6 cents per liter in August 2017.

5 Core inflation

5.1 Core inflation

Core inflation is a measure of inflation which excludes certain items that face volatile price movements e.g. food products and energy. By calculating the core inflation these more volatile components are eliminated from the inflation. Core inflation indices serve to assess the mid- and long-term trend of the overall price level. For the purpose of adjusting monetary policy, many economists focus more intently on the core rate of inflation, as this allows for an in-depth assessment of inflationary processes ongoing in the economy.

5.2 Monthly change of the core inflation

In August 2017 the core inflation (measured over the period August 2016 - 2017) was 0.5%, a decrease of 0.3 ppts compared to August 2016. In August 2017 the food index was 0.9%, while the energy index shows a decrease of 4.4%. Over the past year the food index increased by 1.5 ppts and the energy index increased by 2.8 ppts. Table 9 provides an overview of the monthly inflation and core inflation starting from August 2016.

Table 9: Monthly inflation¹ and core inflation, 2016 - 2017

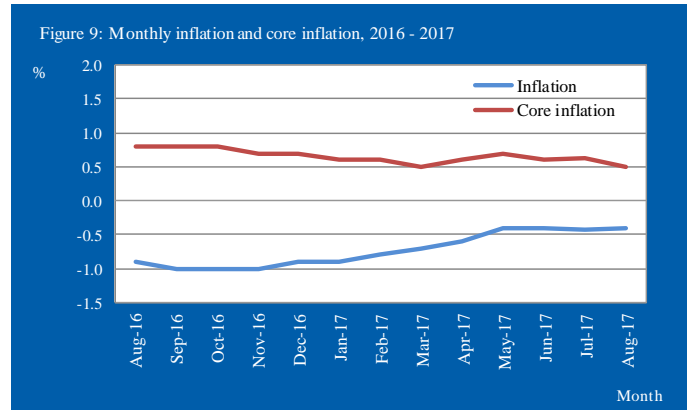

Period	Inflation	Food	Energy ²	Core Inflation

6 Development of Food & catering services

6.1 Monthly change of Food & catering services for August 2017

The “Food & catering services” index shows a decrease of 0.1% in August 2017, after a decrease of 0.2% in July 2017. The index for “Food at home” shows a decrease of 0.2% in August, as eight (8) of the eleven (11) “Food at home” indices decreased in August 2017. The “Fruit” index registered the largest decrease (-1.1%) in August 2017. Furthermore, decreases were posted in the indices for “Milk, cheese and eggs” (-0.6%) and “Sugar, jam, honey and other confectionery” (-0.4%). The “Potatoes and other tubers” index registered the largest increase (1.9%). Furthermore, increases of 0.6% and 0.1% were posted in the indices for “Fish and other seafood” and “Oils and fats”.

Table 11 provides an overview of the corresponding weights per food group together with the percentage changes and effect for August 2017.

Table 11: Percentage change of Food for August 2017

Food	Weight	% Change	Effect
Food & catering services	1,492.8	-0.1	-0.025
Food at home	1,125.3	-0.2	-0.025
Bread and cereals	205.2	0.0	0.000
Meat	229.8	-0.1	-0.002
Fish and other seafood	56.4	0.6	0.004
Milk, cheese and eggs	140.0	-0.6	-0.009

Food products n.e.c.	82.7	-0.1	-0.001
Non-alcoholic beverages	163.9	-0.1	-0.001
Food away from home	367.5	0.0	0.000

Source: Central Bureau of Statistics Aruba

Reference is made to table 18 in Appendix 3. Table 18 provides an overview of the monthly and end of period percentage changes and effect for August 2017 for the food groups.

In August 2017, “Food at home” and “Food away from home” as a group show a decrease in price of 0.1% compared to July 2017, and had an influence of -0.02 ppts on the CPI, while the remaining goods and services, as a group, experienced a decrease in price of 0.2%, causing an effect of -0.16 ppts on the CPI.

An overview of the percentage change and effect for “Food at home” and “Food away from home” for August 2017 is presented in table 12.

Table 12: Effect on the CPI of August 2017 of “Food at home” and “Food away from home”

Category	Weight	% Change	Effect
Food at home	1,125.3	-0.2	-0.02
Food away from home	367.5	0.0	0.00
Total group	1,492.8	-0.1	-0.02
Remaining goods and services	8,507.2	-0.2	-0.16
CPI	10,000.0	-0.2	-0.19

Source: Central Bureau of Statistics Aruba

Figure 11 depicts the monthly Δ Food and catering services over a period of one year starting from August 2016.

6.2 End of Period change of Food & catering services for August 2017

Over the last twelve (12) months, the “Food & catering services” has increased by 1.3%. The “Food at home” index shows an increase of 1.2%. The “Fruit” index increased by 9.8%, the largest increase among the “Food at home” food groups, while the “Milk, cheese and eggs” index shows the largest decrease (-2.9%). The index for “Food away from home” was unchanged in August 2017 after a decrease of 0.1% in July 2017 and has increased by 1.4% over the last twelve (12) months.

7 Subsistence level

7.1 Subsistence level

The subsistence level is the minimum level of income which is perceived necessary to achieve an adequate standard of living in a given country. The subsistence level is usually determined by estimating the cost of all the essential resources that an average adult consumes in one month or year. This is commonly called a basic needs index, and varies according to the price of food, clothing, housing, transport and other items in the "basket". Equivalence scales are used to adjust for the assumed standard of living, of households of different sizes and composition. The scale assigns a weight of 1.0 for the first adult and 0.5 for each additional adult in the household (aged 15+) and a weight of 0.3 for each child (aged 0-14 years). The subsistence level is based on figures of the report "Bestaansminimum 2010" published by the CBS in December 2010 and is monthly updated for inflation using the monthly CPI. The reference unit used in this report is one of a household consisting of two adults and two children (aged 0-14 years).

7.2 Monthly change of the subsistence level for August 2017

Table 13 provides an overview of the subsistence level for a family of two adults and two children (aged 0-14 years) by sector registered over a period of 5 years for the month August. Over a period of one year the subsistence level decreased by Afl.20, from Afl. 4,326 in August 2016 to Afl. 4,306 in August 2017. The "Housing" sector shows the largest decrease (Afl. 42) over this period.

Table 13: Monthly subsistence level in Aruba (in Afl.) by sector for a family of 2 adults and 2 children (aged 0-14 years) for August, 2013 - 2017

Sector	Aug-13	Aug-14	Aug-15	Aug-16	Aug-17
Food and non-alcoholic beverages	1,513	1,543	1,579	1,562	1,580

7.3 Comparison of the subsistence level and minimum wage

In August 2017 the subsistence level for a single adult household is Afl. 2,050, which represents an income deficit of Afl. 339, a decrease of Afl. 43 compared to the deficit observed one year ago (Afl. 382). This deficit is the lowest registered over a period of five years for the month August.

Tabel 15: Monthly income surplus/deficit (in Afl.) for a single adult household for August, 2013 - 2017

Period	1 adult	Minimum	
		wage	Surplus/deficit
2013	2,034	1,637	-397
2014	2,048	1,637	-411
2015	2,087	1,637	-450
2016	2,060	1,678	-382
2017	2,050	1,711	-339

Course of Indices for 2010 up to August 2017

Glossary

The Consumer Price Index and Inflation

The Consumer Price Index (CPI) measures changes in prices of consumer goods and services by households. Consumer price indices can be intended to measure either the rate of price inflation or deflation as perceived by households or changes in their cost of living. In case of inflation, the percentage change is positive and it indicates a decrease in the purchasing power of the consumers.

Monthly percentage change

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of the previous month.

Year-to-date (ytd)

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of December prior to the year under review.

End of period inflation (last 12 months)

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of the same month of the previous year.

Period average inflation (last 24 months)

The period average inflation is calculated by comparing the annual average CPI of the concerning period with the annual average CPI of the concerning period of the previous year.

Effect

Contribution of all percentage changes (of all respective aggregates) to the CPI.

Core inflation

Core inflation is a measure of inflation that excludes certain items which face volatile price movements. Core inflation eliminates the inflation of certain products that can have temporary price shocks because these shocks can diverge from the overall trend of inflation and give a false measure of inflation. The core rate of inflation is calculated by: total inflation excluding food and energy prices. In part, that is because the core is less volatile and reflects better the relationship of supply and demand in domestic product markets. The core usually is a better measure of the basic rate of inflation that will tend to emerge in the absence of supply shocks.

Food & catering services

The "Food & catering services" index is composed of the indices for the "Food & Non-alcoholic beverages" sector ("Food at home") and the "Catering services" ("Food away from home") category.

Subsistence level

The subsistence level is the minimum level of income which is perceived necessary to achieve an adequate standard of living in a given country. The subsistence level is usually determined by estimating the cost of all the essential resources that an average adult consumes in one month or year. This is commonly called a basic needs index, and varies according to the price of food, clothing, housing, transport and other items in the "basket". The subsistence level is monthly updated for inflation using the monthly CPI.
