A note to the reader

he following report presents the price statistics for August 2019.

- As of January 2017, the expenditure weights will be based on the Household Expenditure Survey held by the CBS during the months of May to June of 2016. In order to calculate consistent annual rates of change, the CPI has to be calculated retrospectively for 2 years. Therefore, June of 2019 has been chosen as the new base period for the CPI. Subsequently, the CPI figures for 2017, 2018 and 2019 have been revised accordingly.
- At the end of August 2019 the Consumer Price Index (CPI) shows a decrease of 0.3% compared to the end of July 2019. The sector which affected the CPI the most was "Recreation and culture" (-3.0%), which led to an effect of -0.26 percentage points (ppts) on the Δ CPI of August 2019 (-0.3%).
- Compared to August 2018 the CPI increased by 4.0%. The sector which affected the CPI the most was "Food and non-alcoholic beverages" (15.6%). Specifically, the prices of "Food" (16.5%) registered an increase and caused an effect of 2.35 ppts on the end of period inflation of August 2019 (4.0%).
- The period average inflation for the period August 2018 August 2019 is 4.1%, which is 2.3 ppts higher compared to the period average inflation for the period August 2017 August 2018 (1.8%).
- Utilities (Water and Electricity) did not register price changes in August 2019. The price of gasoline registered an increase of 3.4% in August 2019 and caused an effect of 0.15 ppts on the Δ CPI of August 2019. The price of diesel registered an increase of 1.7% in August 2019 and had an effect of 0.01 ppt on the Δ CPI of August 2019.

This report is divided in 7 sections. An overview of the monthly percentage changes in the CPI and index per sector is presented in section 1. Section 2 provides the yearly percentage changes in the CPI and index per sector. The development of indices of main sectors and utilities is outlined in section 3. Section 4 presents the percentage change in the CPI of Aruba's major trading partners and compares the CPI of Aruba and the USA. Section 5 presents an overview of the monthly and yearly percentage changes of the core inflation. Section 6 presents the price movements in food & catering services. The development of the subsistence level is presented in section 7 and is followed by the appendices.

1 Monthly change of the CPI

1.1 CPI and Inflation

The CPI of the total population of Aruba for the month of August 2019 is 99.80; a decrease of 0.3% compared to the CPI of July 2019 (100.06). An overview of the percentage change in the CPI (Δ CPI) for different periods during 2018 and 2019 is shown in Table 1. The terms percentage change in the CPI and "inflation" (deflation) are considered similar and are used interchangeably. The inflation over the last 12 months (end of period inflation) is 4.0%, while the inflation over a period of 24 months (period average inflation) is 4.1%.

Table 1: Overview of ∆ CPI

| | | % Changes | | Ind | ex |
|-----------------------------|-----------|-----------|------|---------|--------|
| Period | | 2019 | 2018 | Current | Last |
| Monthly | Jul - Aug | -0.3 | -0.6 | 99.80 | 100.06 |
| Year-to-date | Dec - Aug | 3.2 | 3.7 | 99.80 | 96.67 |
| Last 12 months ¹ | Aug - Aug | 4.0 | 4.7 | 99.80 | 95.96 |
| Last 24 months ² | Aug - Aug | 4.1 | 1.8 | 97.74 | 93.89 |

Source: Central Bureau of Statistics Aruba

¹ End of period inflation

² Period average inflation

Figure 1 depicts the monthly Δ CPI over a period of one year starting from August 2018, whereas the Δ CPI for the month August for the years 2010 to 2019 is illustrated in Figure 2.

1.2 Changes in sector

Figure 3 provides an overview of the percentage changes for the indices per sector for August 2019. The percentage change in index is further denoted as Δ I. The largest Δ I is observed for the sector "Recreation and culture" with an increase of 3.0%.

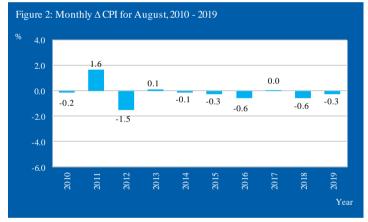

1.3 Changes in categories and subcategories

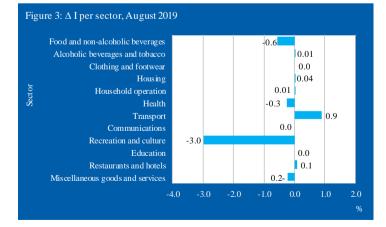

The largest positive and negative Δ I is seen in the categories "Accommodation services" (4.6%) and "Holidays" (-13.6%). In the "Food and non-alcoholic beverages" sector a decrease of 0.6% is observed for the category "Food", while the category "Non-alcoholic beverages" registered an increase of 0.2% in August. In the "Transport" sector the major Δ I is observed for the category "Transport services" (-8.7%), mainly caused by a decrease in "Plane tickets" (-11.6%). In the "Recreation and culture" sector the major Δ I is observed for the category "Holidays" (-13.6%)¹.

The categories which influenced the CPI calculation the most are "Holidays", "Operation of personal transport equipment" and "Food", which had an effect of respectively, -0.26, 0.15 and -0.10 ppts on the Δ CPI. Reference is made to tables 16 and 17 in Appendices 1 and 2. Table 16 provides an overview of the indices for the months August 2018, December 2018, July 2019 and

August 2019 together with corresponding weights per sector and the monthly, year-to-date (ytd), end of period and period average percentage changes for August 2019. In table 17 an overview of the effect on the monthly, year-to-date (ytd), end of period and period average CPI per sector and category for August 2019 is presented. The course of indices for 2010 – up to August 2019 is illustrated in Appendix 5.

¹ The focus is on the four major sectors which are: Housing, Transport, Food and nonalcoholic beverages and Recreation and culture. Together these sectors form 64% of the total weight of the basket of goods and services.

2 End of period change of the CPI

2.1 End of period change CPI for August 2019

The CPI increased from 95.96 in August 2018 to 99.80 in August 2019, an increase of 4.0%. This Δ CPI is the second highest registered over a period of 5 years for the month August, and is 0.7 ppts higher than the Δ CPI registered in 2018 (4.7%) (see table 2).

| Period | Δ CPI | Index |
|-----------|-------|-------|
| 2014-2015 | 0.7 | 94.13 |
| 2015-2016 | -1.4 | 92.82 |
| 2016-2017 | -1.2 | 91.68 |
| 2017-2018 | 4.7 | 95.96 |
| 2018-2019 | 4.0 | 99.80 |

Source: Central Bureau of Statistics Aruba

2.2 Changes in sector

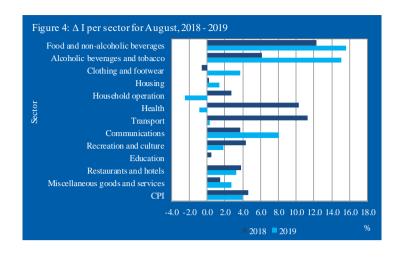

An overview of the percentage change per sector over the period August 2018 - August 2019 is presented in table 3. The largest Δ I is observed for the sector "Food and non-alcoholic beverages" with an increase of 15.6%. Furthermore, increases of 15.1%, 8.0% and 3.7% are observed for the "Alcoholic beverages and tobacco", "Communications" and "Clothing and footwear" sectors, respectively. A comparison of the Δ I's for the years 2018 and 2019 is provided in figure 4.

Table 3: Percentage change for August, 2018 - 2019

| Sector | % Change |
|--------------------------------------------|----------|
| Food and non-alcoholic beverages | 15.6 |
| Alcoholic beverages and tobacco | 15.1 |
| Clothing and footwear | 3.7 |
| Housing | 1.4 |
| Household operation | -2.5 |
| Health | -0.8 |
| Transport | 0.3 |
| Communications | 8.0 |
| Recreation and culture | 1.8 |
| Education | 0.0 |
| Restaurants and hotels | 3.3 |
| Miscellaneous goods and services | 2.7 |
| CPI | 4.0 |
| Source: Central Bureau of Statistics Aruba | |

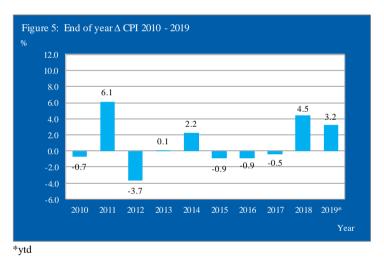

2.3 Changes in categories

The largest positive and negative Δ I in categories observed over a period of one year are respectively, "Alcoholic beverages for consumption at home" (19.8%) and "Telephone and telefax equipment" (-16.6%). For an overview of the end of period percentage changes per category refer to table 16 in Appendix 1.

2.4 End of year change CPI 2010 - 2019

The end of year Δ CPI for the period 2010 - 2019 is shown in figure 5. The Δ CPI for 2019 is calculated by comparing the CPI of August 2019 with the CPI of December 2018. At the end of each year, the end of year percentage change equals the ytd Δ CPI. The ytd Δ CPI for August 2019 is 3.2%.

2.5 Period average change CPI for August 2019

The period average change CPI (Δ ACPI) for August 2019 is 4.1%. Table 4 provides an overview of the Δ ACPI for the month August for the years 2015 to 2019. The Δ ACPI for 2019 increased by 3.3 ppts compared to 2018 (1.8%).

Table 4: Overview of △ ACPI for August, 2015 - 2019

| Period | Δ ΑCPI | Index |
|-----------|--------|-------|
| 2014-2015 | 1.0 | 93.87 |
| 2015-2016 | -0.9 | 92.98 |
| 2016-2017 | -0.8 | 92.27 |
| 2017-2018 | 1.8 | 93.89 |
| 2018-2019 | 4.1 | 97.74 |

CDS CONSUMER PRICE INDEX Aruba Indices of main sectors and utilities

3 Development of indices of main sectors and utilities

3.1 Indices main sectors

The four major sectors, "Housing", "Transport", "Food and nonalcoholic beverages" and "Recreation and culture", constitute 64% of the total weight of the basket of goods and services, which are observed on a monthly basis. An overview of the course of indices for 2010 – up to August 2019 per sector and for the CPI is provided in figures 9-1 to 9-12 in Appendix 5.

Changes in the indices of the sectors "Housing" and "Transport" are mainly the result of changes in the international oil prices and prices of utilities during the respective months. The development of crude oil, fuel surcharge, electricity, water, gasoline and diesel prices is provided in table 5 and in the adjoining figures 6-1 and 6-2.

Table 5: Prices of utilities, gasoline and diesel, 2018 - 2019

| | | Total | Total | | | | |
|--------|-------------------------|----------------------------|----------------------------|--------------------------|-----------|-----------|---------|
| | Crude oil | energy charge ² | energy charge ² | | | | |
| Month | per barrel ¹ | ≤ 500 kWh | 501-1000 kWh | Electricity ³ | $Water^4$ | Gasoline⁵ | Diesel⁵ |

² Total energy charge in Afl. cents per kWh

³ Electricty price in Afl.

⁴ Water price in Afl.

⁵ Gasoline and diesel prices in Afl. cents per liter

3.2 Electricity

The price of electricity is determined in Aruban florins (Afl.) for an average usage by households. The average usage is 725.5 kWh per month. The electricity price for an average consumption of 725.5 kWh did not change in August 2019, it remained at Afl. 265.65. Figure 6-1 provides an overview of the course of changes in the electricity price for the period 2011 to 2018.

The total energy charge per kWh for a usage of electricity up to 500 kWh did not change in August 2019, it stayed at Afl. 34.52 cents per kWh. The total energy charge per kWh for a usage of electricity between 501 - 1000 kWh did not change in August 2019, it stayed at Afl. 35.72 cents per kWh.

3.3 Water

The price of water is determined in Afl. for an average usage (water consumption) by households. Figure 6-1 provides an overview of the course of changes in the water price for the period 2011 to 2018. The water price for an average usage by households did not change in August 2019, it remained at Afl. 137.05.

3.4 Gasoline and Diesel

The retail price of gasoline increased by 3.4% from 208.0 cents per liter in July 2019 to 215.1 cents per liter in August 2019. In August 2019, the retail price of diesel registered an increase of 1.7% from 174.2 cents per liter in July 2019 to 177.2 cents per liter in August 2019.

Figure 7: Monthly \triangle CPI for Aruba and the USA, 2018 - 2019

5 Core inflation

5.1 Core inflation

Core inflation is a measure of inflation which excludes certain items that face volatile price movements e.g. food products and energy. By calculating the core inflation these more volatile components are eliminated from the inflation. Core inflation indices serve to assess the mid- and long-term trend of the overall price level. For the purpose of adjusting monetary policy, many economists focus more intently on the core rate of inflation, as this allows for an in-depth assessment of inflationary processes ongoing in the economy.

5.2 Monthly change of the core inflation

In August 2019 the core inflation (measured over the period August 2018 - 2019) was 2.9%. In August 2019 the food index was 12.4%, while the energy index shows an increase of 1.4%.

Table 9: Monthly inflation¹ and core inflation, 2018 - 2019

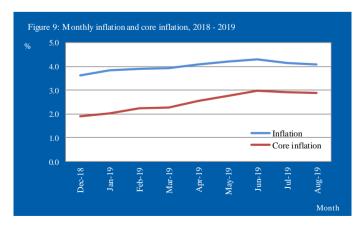

| | | | | Core |
|--------|-----------|------|---------------------|-----------|
| Period | Inflation | Food | Energy ² | Inflation |
| Dec-18 | 3.6 | 11.4 | 3.8 | 1.9 |
| Jan-19 | 3.8 | 12.4 | 3.7 | 2.0 |

6 Development of Food & catering services

6.1 Monthly change of Food & catering services for **August 2019**

The "Food & catering services" index showed a decrease of 0.4% in August 2019, after a decrease of also 0.4% in July 2019. The index for "Food at home" showed a decrease of 0.6% in August, as five (5) of the eleven (11) "Food at home" indices decreased in August 2019. The "Fruit" index registered the largest decrease (-3.0%) in August 2019. Furthermore, decreases were posted in the indices for "Bread and cereals" (-1.2%) and "Sugar, jam, honey and other confectionery" (-0.3%).

The "Potatoes and other tubers" index registered the largest increase (7.1%) in August 2019.

Table 11 provides an overview of the corresponding weights per food group together with the percentage changes and effect for August 2019.

Table 11: Percentage change of Food for August 2019

| Food | Weight | % Change | Effect |
|--------------------------------------------|----------|----------|--------|
| Food & catering services | 1,492.8 | -0.4 | -0.100 |

Figure 11 depicts the monthly Δ Food and catering services over a period of one year starting from August 2018.

6.2 End of Period change of Food & catering services for August 2019

Over the last twelve (12) months, the "Food & catering services" has increased by 12.5%. The "Food at home" index showed an increase of 15.6%. The "Fruit" index increased by 41.9%, the largest increase among the "Food at home" food groups. The index for "Food away from home" was unchanged in August 2019 and has increased by 3.1% over the last twelve (12) months.

Table 18 provides an overview of the monthly and end of period percentage changes and effect for August 2019 for the food groups.

7 Subsistence level

7.1 Subsistence level

The subsistence level is the minimum level of income which is perceived necessary to achieve an adequate standard of living in a given country. The subsistence level is usually determined by estimating the cost of all the essential resources that an average adult consumes in one month or year. This is commonly called a basic needs index, and varies according to the price of food, clothing, housing, transport and other items in the "basket". Equivalence scales are used to adjust for the assumed standard of living, of households of different sizes and composition. The scale assigns a weight of 1.0 for the first adult and 0.5 for each additional adult in the household (aged 15+) and a weight of 0.3 for each child (aged 0-14 years). The subsistence level is based on figures of the report "Bestaansminimum 2010" published by the CBS in December 2010 and is monthly updated for inflation using the monthly CPI. The reference unit used in this report is one of a household consisting of two adults and two children (aged 0-14 vears).

7.2 Monthly change of the subsistence level for **August 2019**

Table 13 provides an overview of the subsistence level for a family of two adults and two children (aged 0-14 years) by sector registered over a period of 5 years for the month August. Over a period of one year the subsistence level increased by Afl. 339, from Afl. 4,642 in August 2018 to Afl. 4,981 in August 2019. The "Food and non-alcoholic beverages" sector shows the largest increase (Afl. 293), over this period.

Course of Indices for 2010 up to August 2019

Glossary

The Consumer Price Index and Inflation

The Consumer Price Index (CPI) measures changes in prices of consumer goods and services by households. Consumer price indices can be intended to measure either the rate of price inflation or deflation as perceived by households or changes in their cost of living. In case of inflation, the percentage change is positive and it indicates a decrease in the purchasing power of the consumers.

Monthly percentage change

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of the previous month.

Year-to-date (ytd)

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of December prior to the year under review.

End of period inflation (last 12 months)

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of the same month of the previous year.

Period average inflation (last 24 months)

The period average inflation is calculated by comparing the annual average CPI of the concerning period with the annual average CPI of the concerning period of the previous year.

Effect

Contribution of all percentage changes (of all respective aggregates) to the CPI.

Core inflation

Core inflation is a measure of inflation that excludes certain items, which face volatile price movements. Core inflation eliminates the inflation of certain products that can have temporary price shocks because these shocks can diverge from the overall trend of inflation and give a false measure of inflation. The core rate of inflation is calculated by: total inflation excluding food and energy prices. In part, that is because the core is less volatile and reflects better the relationship of supply and demand in domestic product markets. The core usually is a better measure of the basic rate of inflation that will tend to emerge in the absence of supply shocks.

Food & catering services

The "Food & catering services" index is composed of the indices for the "Food & Non-alcoholic beverages" sector ("Food at home") and the "Catering services" ("Food away from home") category.

Subsistence level

The subsistence level is the minimum level of income, which is perceived necessary to achieve an adequate standard of living in a given country. The subsistence level is usually determined by estimating the cost of all the essential resources that an average adult consumes in one month or year. This is commonly called a basic needs index, and varies according to the price of food, clothing, housing, transport and other items in the "basket". The subsistence level is monthly updated for inflation using the monthly CPI.
