A note to the reader

The following report presents the price statistics for September 2020.

- As of February 2017, the expenditure weights are based on the Household Expenditure Survey held by the CBS during the months of September to September of 2016. In order to calculate consistent annual rates of change, the CPI had to be calculated retrospectively for 2 years. Therefore, September of 2019 was chosen as the new base period for the CPI. Subsequently, the CPI figures for 2017, 2018 and 2019 were revised accordingly.
- At the end of September 2020 the Consumer Price Index (CPI) shows an increase of 0.2% compared to the end of August 2020. The sector which affected the CPI the most was “Housing” (0.8%), which led to an effect of 0.21 percentage points (ppts) on the Δ CPI of September 2020 (0.2%).
- Compared to September 2019 the CPI increased by 0.9%. The sector which affected the CPI the most was “Recreation and culture” (17.6%).
- The period average inflation for the period September 2019 - September 2020 is 2.7%, which is 1.3 ppts lower compared to the period average inflation for the period September 2018 - September 2019 (4.1%).
- Utilities (Water and Electricity) did not register price changes in September 2020. The price of gasoline registered an increase of 1.2% in September 2020 and caused an effect of 0.05 ppts on the Δ CPI of September 2020. The price of diesel registered a decrease of 0.1% in September 2020 and had an insignificant effect on the Δ CPI of September 2020.

This report is divided in 7 sections. An overview of the monthly percentage changes in the CPI and index per sector is presented in section 1. Section 2 provides the yearly percentage changes in the CPI and index per sector. The development of indices of main sectors and utilities is outlined in section 3. Section 4 presents the percentage change in the CPI of Aruba’s major trading partners and compares the CPI of Aruba and the USA. Section 5 presents an overview of the monthly and yearly percentage changes of the core inflation. Section 6 presents the price movements in food & catering services. The development of the subsistence level is presented in section 7 and is followed by the appendices.

1 Monthly change of the CPI

1.1 CPI and Inflation

The CPI of the total population of Aruba for the month of September 2020 is 100.91; a decrease of 0.2% compared to the CPI of August 2020 (100.66). An overview of the percentage change in the CPI (Δ CPI) for different periods during 2019 and 2020 is shown in Table 1. The terms percentage change in the CPI and “inflation” (deflation) are considered similar and are used interchangeably. The inflation over the last 12 months (end of period inflation) is 0.9%, while the inflation over a period of 24 months (period average inflation) is 2.7%.

Table 1: Overview of Δ CPI

Period		% Changes		Index	
		2020	2019	Current	Last
Monthly	Aug - Sep	0.2	0.2	100.91	100.66
Year-to-date	Dec - Sep	-0.7	3.4	100.91	101.66
Last 12 months ¹	Sep - Sep	0.9	4.4	100.91	100.00
Last 24 months ²	Sep - Sep	2.7	4.1	100.71	97.74

¹ End of period inflation

² Period average inflation

Figure 1 depicts the monthly Δ CPI over a period of one year starting from September 2019, whereas the Δ CPI for the month September for the years 2011 to 2020 is illustrated in Figure 2.

1.2 Changes in sector

Figure 3 provides an overview of the percentage changes for the indices per sector for September 2020. The percentage change in index is further denoted as Δ I. The largest Δ I is observed for the “Clothing and footwear” sector with an increase of 4.0%

1.3 Changes in categories and subcategories

The largest positive and negative Δ I is seen in the categories “Glassware, tableware and household utensils” (11.3%) and “Health products and services n.e.c.” (-31.8%). In the “Food and non-alcoholic beverages” sector a decrease of 0.3% is observed for the category “Food”, while the “Non-alcoholic beverages” shows a decrease of 0.5%. In the “Transport” sector the major Δ I is observed for the category “Operation of personal transport equipment” (1.1%). In the “Recreation and culture” sector the major Δ I is observed for the category “Audio-visual, photographic and information processing equipment” (-10.4%).

The categories which influenced the CPI calculation the most are “Maintenance and repair of the dwelling”, “Operation of personal transport equipment” and “Clothing” which had an effect of respectively, 0.20, 0.08 and 0.08 ppts on the Δ CPI. Reference is made to tables 16 and 17 in Appendices 1 and 2. Table 16 provides

an overview of the indices for the months September 2019, December 2019, August 2020 and September 2020 together with corresponding weights per sector and the monthly, year-to-date (ytd), end of period and period average percentage changes for September 2020. In table 17 an overview of the effect on the monthly, year-to-date (ytd), end of period and period average CPI per sector and category for September 2020 is presented. The course of indices for 2010 – up to September 2020 is illustrated in Appendix 5.

Figure 1: Monthly Δ CPI, 2019 - 2020

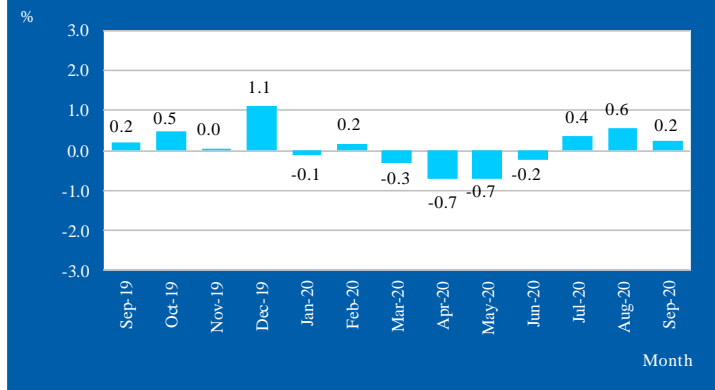

Figure 2: Monthly Δ CPI for September, 2011 - 2020

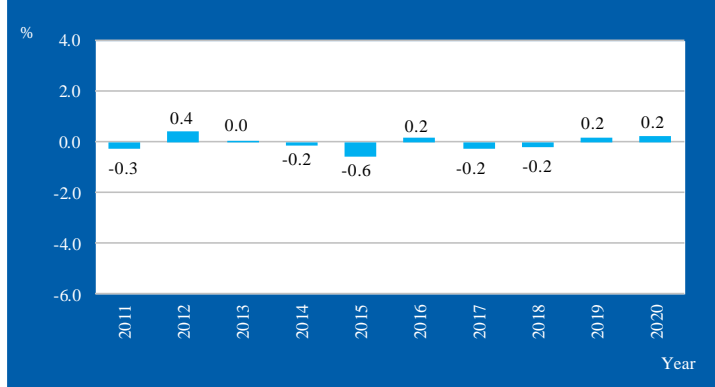

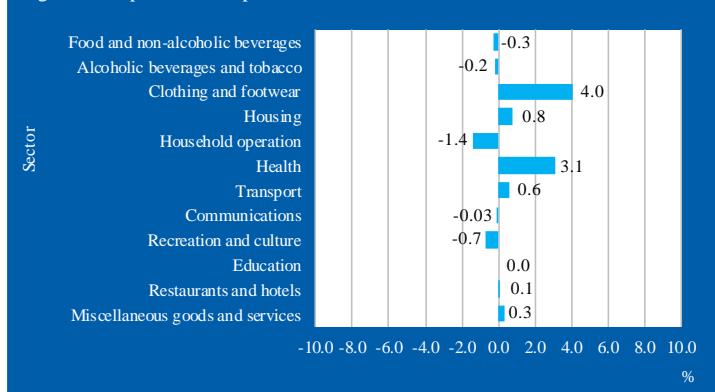

Figure 3: Δ I per sector, September 2020

¹ The focus is on the four major sectors which are: Housing, Transport, Food and non-alcoholic beverages and Recreation and culture. Together these sectors form 59% of the total weight of the basket of goods and services.

2 End of period change of the CPI

2.1 End of period change CPI for September 2020

The CPI increased from 100.00 in September 2019 to 100.91 in September 2020, an increase of 0.9%. This Δ CPI is the third lowest registered over a period of 5 years for the month September, and is 3.5 pts lower than the Δ CPI registered in 2019 (4.4%) (see table 2).

Table 2: End of period Δ CPI for September, 2016 - 2020

Period	Δ CPI	Index
2015-2016	-0.7	92.96
2016-2017	-1.6	91.45
2017-2018	4.7	95.77
2018-2019	4.4	100.00
2019-2020	0.9	100.91

Source: Central Bureau of Statistics Aruba

2.2 Changes in sector

An overview of the percentage change per sector over the period September 2019 - September 2020 is presented in table 3. The largest Δ I is observed for the sector "Recreation and culture" with an increase of 17.6%. Furthermore, increases of 4.9%, 1.9% and 1.2% are observed for the "Health", "Restaurants and hotels" and "Alcoholic beverages and tobacco" sectors, respectively. A comparison of the Δ I's for the years 2019 and 2020 is provided in figure 4.

Table 3: Percentage change for September, 2019 - 2020

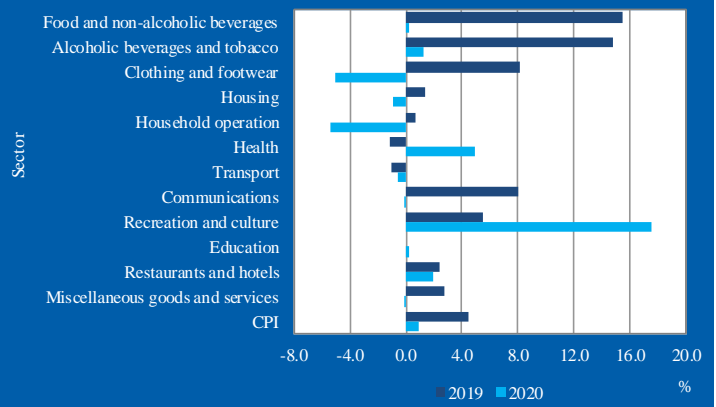

Sector	% Change
Food and non-alcoholic beverages	0.3
Alcoholic beverages and tobacco	1.2
Clothing and footwear	-5.0
Housing	-0.9
Household operation	-5.4
Health	4.9
Transport	-0.6
Communications	0.0
Recreation and culture	17.6
Education	0.2
Restaurants and hotels	1.9
Miscellaneous goods and services	-0.1
CPI	0.9

Source: Central Bureau of Statistics Aruba

2.3 Changes in categories

The largest positive and negative Δ I in categories observed over a period of one year are respectively, "Holidays" (69.2%) and "Furniture, furnishings, carpets and other floor coverings" (-43.4%). For an overview of the end of period percentage changes per category refer to table 16 in Appendix 1.

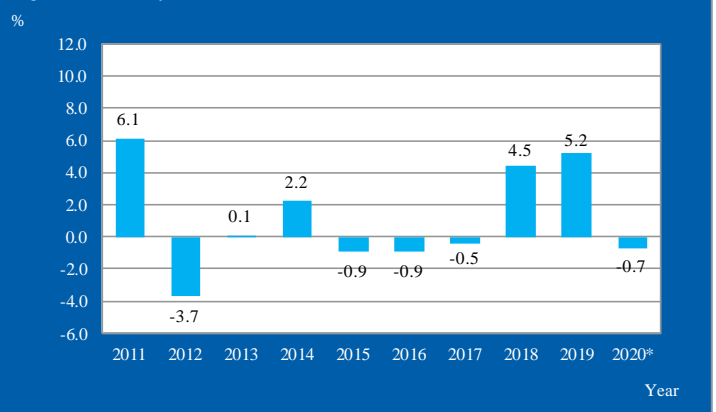

Figure 4: Δ I per sector for September, 2019 - 2020

2.4 End of year change CPI 2011 - 2020

The end of year Δ CPI for the period 2011 - 2020 is shown in figure 5. The Δ CPI for 2020 is calculated by comparing the CPI of September 2020 with the CPI of December 2019. The ytd Δ CPI for September 2020 is -0.7%.

Figure 5: End of year Δ CPI 2011 - 2020

ytd

2.5 Period average change CPI for September 2020

The period average change CPI (Δ ACPI) for September 2020 is 2.7%. Table 4 provides an overview of the Δ ACPI for the month September for the years 2016 to 2020. The Δ ACPI for 2020 decreased by 1.3 pts compared to 2019 (4.1%).

Table 4: Overview of Δ ACPI for September, 2016 - 2020

Period	Δ ACPI	Index
2015-2016	-1.0	92.93
2016-2017	-0.8	92.15
2017-2018	2.3	94.25
2018-2019	4.1	98.09
2019-2020	2.7	100.79

3 Development of indices of main sectors and utilities

3.1 Indices main sectors

The four major sectors, “Housing”, “Transport”, “Food and non-alcoholic beverages” and “Recreation and culture”, constitute 64% of the total weight of the basket of goods and services, which are observed on a monthly basis. An overview of the course of indices for 2010 – up to September 2020 per sector and for the CPI is provided in figures 9-1 to 9-12 in Appendix 5.

Changes in the indices of the sectors “Housing” and “Transport” are mainly the result of changes in the international oil prices and prices of utilities during the respective months. The development of crude oil, fuel surcharge, electricity, water, gasoline and diesel prices is provided in table 5 and in the adjoining figures 6-1 and 6-2.

Table 5: Prices of utilities, gasoline and diesel, 2019 - 2020

Month	Crude oil per barrel ¹	Total energy charge ²		Electricity ³	Water ⁴	Gasoline ⁵	Diesel ⁵
		≤ 500 kWh	501-1000 kWh				
Sep-19	57.03	34.52	35.72	265.65	137.05	204.50	172.80

¹ Average West Texas Intermediate (WTI) crude oil price per barrel in US\$ (Source: U.S. Energy Information Administration)

² Total energy charge in Afl. cents per kWh

³ Electricity price in Afl.

⁴ Water price in Afl.

⁵ Gasoline and diesel prices in Afl. cents per liter

3.2 Electricity

The price of electricity is determined in Aruban florins (Afl.) for an average usage by households. The average usage is 725.5 kWh per month. The electricity price for an average consumption of 725.5 kWh did not change in September 2020, it remained at Afl. 240.09. Figure 6-1 provides an overview of the course of changes in the electricity price for the period 2013 to 2020.

The total energy charge per kWh for a usage of electricity up to 500 kWh did not change in September 2020, it stayed at Afl. 31.09 cents per kWh. The total energy charge per kWh for a usage of electricity between 501 - 1000 kWh did not change in September 2020, it stayed at Afl. 31.99 cents per kWh.

3.3 Water

The price of water is determined in Afl. for an average usage (water consumption) by households. Figure 6-1 provides an overview of the course of changes in the water price for the period 2013 to 2020. The water price for an average usage by households did not change in September 2020, it remained at Afl. 137.05.

3.4 Gasoline and Diesel

The retail price of gasoline decreased by 1.2% from 178.1 cents per liter in August 2020 to 180.2 cents per liter in September 2020. In September 2020, the retail price of diesel registered a decrease of 0.1% from 140.7 cents per liter in August 2020 to 140.5 cents per liter in September 2020.

5 Core inflation

5.1 Core inflation

Core inflation is a measure of inflation which excludes certain items that face volatile price movements e.g. food products and energy. By calculating the core inflation these more volatile components are eliminated from the inflation. Core inflation indices serve to assess the mid- and long-term trend of the overall price level. For the purpose of adjusting monetary policy, many economists focus more intently on the core rate of inflation, as this allows for an in-depth assessment of inflationary processes ongoing in the economy.

5.2 Monthly change of the core inflation

In September 2020 the core inflation (measured over the period September 2019 - 2020) was 4.4%. In September 2020 the food index was 5.6%, while the energy index shows a decrease of 6.5%.

Table 9: Monthly inflation¹ and core inflation, 2019 - 2020

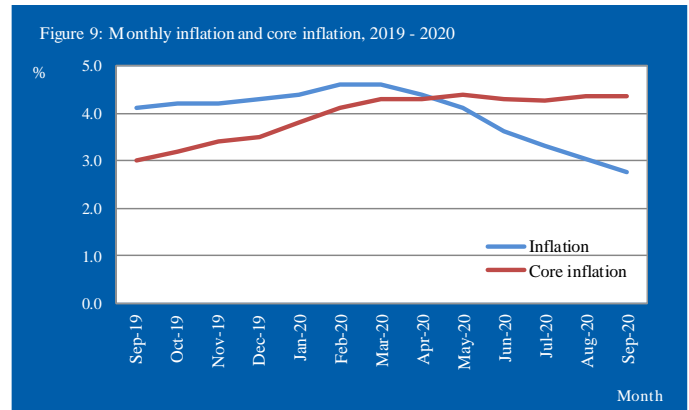

Period	Inflation	Food	Energy ²	Core Inflation
Sep-19	4.1	13.1	0.8	3.0
Oct-19	4.2	13.5	0.3	3.2
Nov-19	4.2	13.5	-0.2	3.4

6 Development of Food & catering services

6.1 Monthly change of Food & catering services for September 2020

The “Food & catering services” index showed a decrease of 0.2% in September 2020, after a decrease of 0.3% in August 2020. The index for “Food at home” showed a decrease of 0.3% in September, as six (6) of the eleven (11) “Food at home” indices decreased in September 2020. The “Vegetables” index registered the largest decrease (-1.6%) in September 2020. Furthermore, decreases were posted in the indices for “Fruit” (-1.2%), “Sugar, jam, honey and other confectionery” (-0.6%) and “Non-alcoholic beverages” (-0.5%). The “Potatoes and other tubers” index registered the largest increase (9.7%) in September 2020.

Table 11 provides an overview of the corresponding weights per food group together with the percentage changes and effect for September 2020.

Table 11: Percentage change of Food for September 2020

Food	Weight	% Change	Effect
Food & catering services	1,492.8	-0.2	-0.047
<i>Food at home</i>	1,125.3	-0.3	-0.052

Other services	3,360.0	0.0	0.008
CPI	10,000.0	0.2	0.248

Source: Central Bureau of Statistics Aruba

In September 2020, “Food at home” and “Food away from home” as a group showed a decrease in price of 0.2% compared to August 2020, and had an influence of -0.05 ppts on the CPI, while the remaining goods and services, as a group, experienced an increase in price of 0.4%, causing an effect of 0.29 ppts on the CPI.

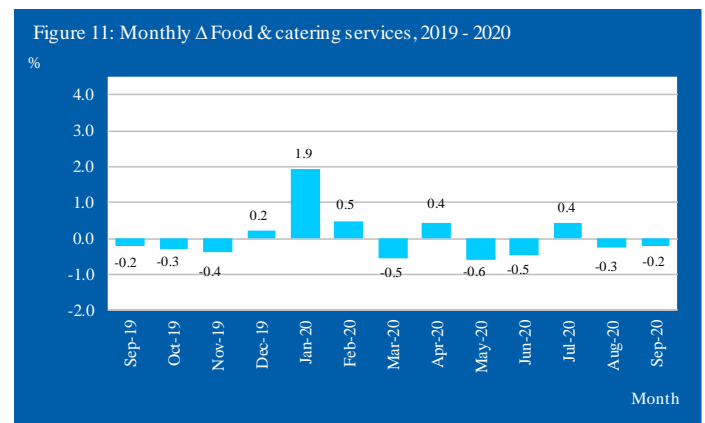

An overview of the percentage change and effect for “Food at home” and “Food away from home” for September 2020 is presented in table 12.

Table 12: Effect on the CPI of September 2020 of “Food at home” and “Food away from home”

Category	Weight	% Change	Effect
Food at home	1,087.7	-0.3	-0.05
Food away from home	429.8	0.1	0.01
Total group	1,517.5	-0.2	-0.05
Remaining goods and services	8,482.5	0.4	0.29
CPI	10,000.0	0.2	0.25

Source: Central Bureau of Statistics Aruba

Figure 11 depicts the monthly Δ Food and catering services over a period of one year starting from September 2019.

6.2 End of Period change of Food & catering services for September 2020

Over the last twelve (12) months, the “Food & catering services” has increased by 0.7%. The “Food at home” index showed an increase of 0.3%. The “Potatoes and other tubers” index increased by 14.3%, the largest increase among the “Food at home” food groups, while the “Fruit” index decreased by 3.4%, the largest decrease among the “Food at home” food groups.

The index for “Food away from home” shows an increase of 0.1% in September 2020 and has increased by 2.1% over the last twelve (12) months.

Table 18 provides an overview of the monthly and end of period percentage changes and effect for September 2020 for the food groups.

7 Subsistence level

7.1 Subsistence level

The subsistence level is the minimum level of income which is perceived necessary to achieve an adequate standard of living in a given country. The subsistence level is usually determined by estimating the cost of all the essential resources that an average adult consumes in one month or year. This is commonly called a basic needs index, and varies according to the price of food, clothing, housing, transport and other items in the "basket". Equivalence scales are used to adjust for the assumed standard of living, of households of different sizes and composition. The scale assigns a weight of 1.0 for the first adult and 0.5 for each additional adult in the household (aged 15+) and a weight of 0.3 for each child (aged 0-14 years). The subsistence level is based on figures of the report "Bestaansminimum 2010" published by the CBS in December 2010 and is monthly updated for inflation using the monthly CPI. The reference unit used in this report is one of a household consisting of two adults and two children (aged 0-14 years).

7.2 Monthly change of the subsistence level for September 2020

Table 13 provides an overview of the subsistence level for a family of two adults and two children (aged 0-14 years) by sector registered over a period of 5 years for the month September. Over a period of one year the subsistence level increased by Afl. 4, from Afl. 4,992 in September 2019 to Afl. 4,996 in September 2020. The "Recreation and culture" sector shows the largest increase (Afl. 31), over this period.

Table 13: Monthly subsistence level in Aruba (in Afl.) by sector for a family of 2 adults and 2 child (aged 0-14 years) for September, 2016 - 2020

Sector	Sep-16	Sep-17	Sep-18	Sep-19	Sep-20	Change in Afl.

7.3 Comparison of the subsistence level and minimum wage

In September 2020 the subsistence level for a single adult household is Afl. 2,379, which represents an income deficit of Afl. 564, a decrease of Afl. 51 compared to the deficit observed one year ago (Afl. 615). This deficit is the second highest registered over a period of five years for the month September.

Table 15: Monthly income surplus/deficit (in Afl.) for a single adult household for September, 2016 - 2020

Period	Minimum		Surplus/deficit
	1 adult	wage	
2016	2,065	1,678	-387
2017	2,085	1,711	-374
2018	2,208	1,711	-497
2019	2,377	1,762	-615
2020	2,379	1,815	-564

Course of Indices for 2010 up to September 2020

Glossary

The Consumer Price Index and Inflation

The Consumer Price Index (CPI) measures changes in prices of consumer goods and services by households. Consumer price indices can be intended to measure either the rate of price inflation or deflation as perceived by households or changes in their cost of living. In case of inflation, the percentage change is positive and it indicates a decrease in the purchasing power of the consumers.

Monthly percentage change

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of the previous month.

Year-to-date (ytd)

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of December prior to the year under review.

End of period inflation (last 12 months)

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of the same month of the previous year.

Period average inflation (last 24 months)

The period average inflation is calculated by comparing the annual average CPI of the concerning period with the annual average CPI of the concerning period of the previous year.

Effect

Contribution of all percentage changes (of all respective aggregates) to the CPI.

Core inflation

Core inflation is a measure of inflation that excludes certain items, which face volatile price movements. Core inflation eliminates the inflation of certain products that can have temporary price shocks because these shocks can diverge from the overall trend of inflation and give a false measure of inflation. The core rate of inflation is calculated by: total inflation excluding food and energy prices. In part, that is because the core is less volatile and reflects better the relationship of supply and demand in domestic product markets. The core usually is a better measure of the basic rate of inflation that will tend to emerge in the absence of supply shocks.

Food & catering services

The “Food & catering services” index is composed of the indices for the “Food & Non-alcoholic beverages” sector (“Food at home”) and the “Catering services” (“Food away from home”) category.

Subsistence level

The subsistence level is the minimum level of income, which is perceived necessary to achieve an adequate standard of living in a given country. The subsistence level is usually determined by estimating the cost of all the essential resources that an average adult consumes in one month or year. This is commonly called a basic needs index, and varies according to the price of food, clothing, housing, transport and other items in the “basket”. The subsistence level is monthly updated for inflation using the monthly CPI.
