

## Consumer Price Index, base period June 2019

### October 2023

The Central Bureau of Statistics presents the most important findings for the Consumer Price Index (CPI) for the month of October 2023.

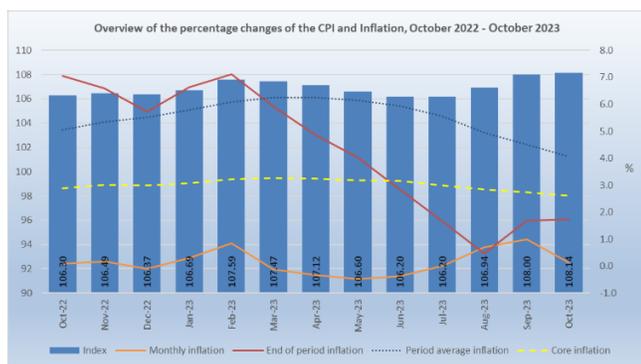

### Consumer Price Index for the month of October 2023

The CPI for October 2023 (108.14), shows an increase of 0.1% compared to the index of September 2023 (108.00).

The percentage change of the CPI over the last twelve (12) months (October 2022 to October 2023) is 1.7, a decrease of 5.3 percentage points (ppts) compared to the percentage change for the same period of last year (7.0%).

The period average (last 24 months) percentage change of the CPI for the periods October 2021 to October 2022 and October 2022 to October 2023 is 4.1%, a decrease of 1.0 ppt compared to the period average percentage change over the periods October 2020 to October 2021 and October 2021 to October 2022 (5.1%).

During this month, six (6) of the twelve (12) sectors registered increases in prices. The increases that had the greatest influence on the CPI were registered for the "Recreation and culture" (1.5%) and "Household operation" (0.9%) sectors, which contributed with an effect of 0.13 and 0.08 ppts, respectively. The increases in the remaining sectors had an effect of 0.04 ppts on the CPI of October 2023.

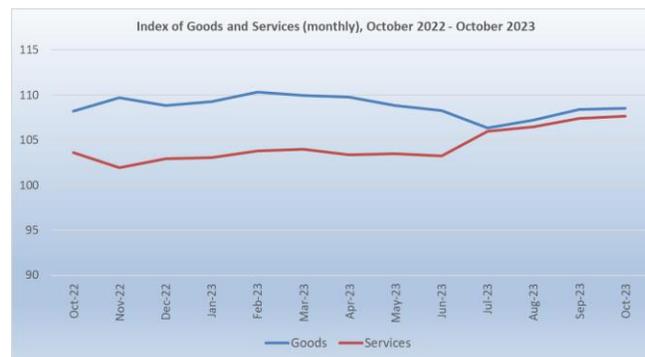

Aforementioned increases were partially offset mainly by decreases in the indices for the "Communications" (-0.5%) and "Housing" (-0.2%) sectors, which each caused an effect of -0.04 ppts. The decreases in the remaining sectors had an effect of -0.03 ppts on the CPI of October 2023.

The increase in the "Recreation and culture" sector was mainly due to an increase in the category "Holidays" (4.7%), which contributed to an effect of 0.10 ppts. The increase in the "Household operation" sector was mainly due to an increase of 2.3% in the category "Household appliances", which contributed to an effect of 0.06 ppts.

The decrease in the "Communications" sector was due to a decrease in the category "Telephone and telefax equipment" (-13.7%), which contributed to an effect of -0.04 ppts. The decrease in the "Housing" sector was due to a decrease of 0.8% in the category "Maintenance and repair of the dwelling", which contributed to an effect of -0.05 ppts.

### Consumption basket

The consumption basket of the CPI consists of 408 goods and services. Compared to September 2023, 42.9% of these products had an increase in price, causing an effect of 0.71 ppts, while 37.5% showed a decrease, contributing to an effect of -0.58 ppts and the remaining 19.6% had no change in price. The prices of goods increased by 0.1% and caused an influence of 0.04 ppts. The prices of services showed an increase of 0.2% and had an influence of 0.09 ppts on the CPI of October 2023.

CPI (BASE JUN 2019 = 100)							CPIC			SUBSISTENCE LEVEL			
Month	Year	Index	Monthly	Year-to-date	End of period	Period average	Goods	Services	CPIC	Energy	Food	1 adult	2 adults + 2 children

October	2022	106.30	0.1	5.7	7.0	5.1	-0.3	0.7	2.9	12.8	9.0	2,529	5,311

## Core inflation

The CPIC (core inflation) - CPI excluding the effect of energy and food – was 2.6% in October 2023. The energy index - which consists of the products: electricity, water, gasoline and diesel – was 7.7%. The food index showed an increase of 8.4%.

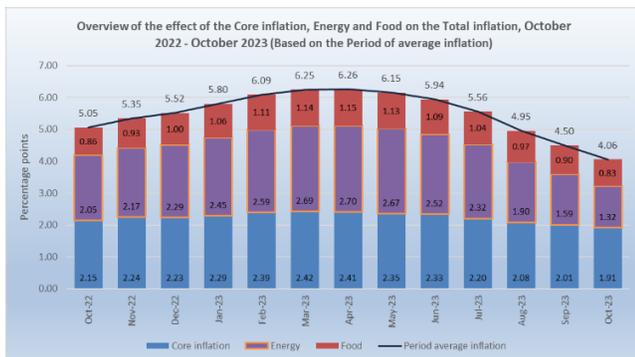

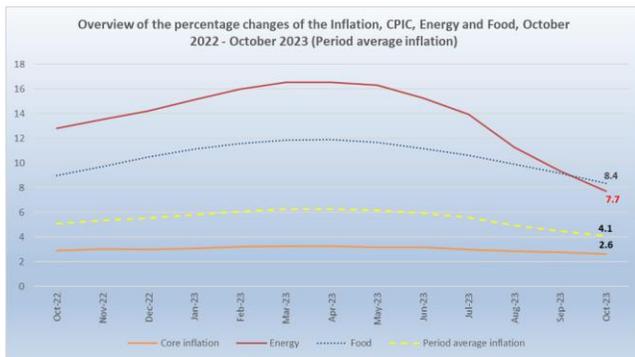

### What is CPIC?

The CPIC (core inflation) is a portion of the inflation where certain items, which have volatile price movements are excluded, such as food products and energy. When calculating the core inflation, the most volatile components are eliminated from the inflation. The core inflation index is used to assess the medium and long-term trends of the general level of prices. For purposes of economic policy-making, especially monetary policy, many economists focus on the proportion of the core inflation, as this allows a more in-depth evaluation of the recent inflation developments in the economy. The annual average of the CPI is used to calculate the CPIC.

The CPIC is calculated by comparing the average index for the most recent 12-month period compared with the preceding 12-month period.

The three main uses of a CPI are:

1. a calculation method to compensate employees due to the loss of purchasing power, adjusting their salaries, with the percentage change rate of the CPI, which is known as indexation.
2. a tool used in National Accounts to adjust components of the gross domestic product (GDP) from nominal terms to real terms. (For example, by eliminating the effect of the price changes from the consumption value)
3. a means commonly used by governments and central banks to set inflation targets.

## Subsistence level

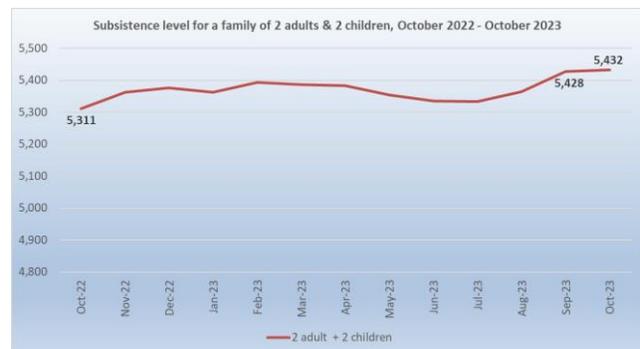

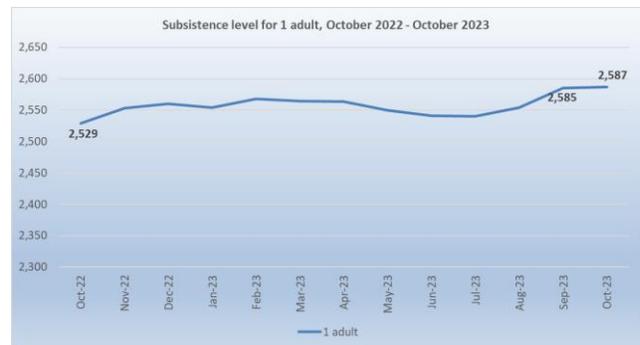

The subsistence level for a household consisting of two (2) adults and two (2) children (aged 0-15 years) in October 2023 is Afl. 5,432, an increase of Afl. 4 compared to September 2023 (Afl. 5,428). The subsistence level for a single adult household is Afl. 2,587, an increase of Afl. 2 compared to September 2023 (Afl. 2,585).

### What is the Subsistence level and how is it adjusted?

The CBS defines the subsistence level as the minimum level of income that is perceived as necessary for a person or family to be able to function in the society in an adequate and socially acceptable manner. When the definition of subsistence level is used, it refers in reality to a "Social subsistence level" and not the literal definition "the money needed to purchase those goods and services deemed necessary for living a life free of basic deprivation" (United Nations).

A subsistence level index was created by calculating the cost of the essential resources that an average adult consumes during a month. Each month this index is adjusted, based on the prices of food, clothing, shelter, transportation, and other items in the basket.

The current subsistence level is based on the "Subsistence level 2010" report published by the CBS in December 2010, and is updated monthly according to the CPI. The reference unit used in this report is of a household consisting of two adults and two children (0 to 14 years). The total weight of such household is 2.1 (1.0 + 0.5 + 0.3 + 0.3).

## The subsistence level in October 2023

The subsistence level is the minimum level of income which is perceived necessary to achieve an adequate standard of living in a given country. The subsistence level is usually determined by estimating the cost of all the essential resources that an average adult consumes in one month or year. This is commonly called a basic needs index, and varies according to the price of food, clothing, housing, transport and other items in the "basket". Equivalent scales are used to adjust the assumed standard of living, of households of different sizes and composition. The scale assigns a weight of 1.0 for the first adult and 0.5 for each additional adult in the household (aged 15+) and a weight of 0.3 for each child (aged 0-14 years). The subsistence level is based on figures of the report "Bestaansminimum 2010" and is monthly updated for inflation using the monthly CPI. The reference unit used in this report is a household consisting of two (2) adults and two (2) children (aged 0-14 years).

In October 2023 the monthly subsistence level for a household consisting of two (2) adults and two (2) children (aged 0-14 years) (Afl. 5,432) showed an increase of Afl. 121 compared to October 2022 (Afl. 5,311) and was mainly caused by an increase of Afl. 79 in the sector "Food and non-alcoholic beverages".

Table 1 Monthly subsistence level in Aruba (in Afl.) by sector for a family of 2 adults and 2 children (aged 0-14 years)

Sector	Oct-22	Oct-23	Absolute Change

In October 2023, the monthly subsistence level for a single adult household is Afl 2,587, which represents an income deficit of Afl. 694, a decrease of Afl. 20 compared to the deficit observed one year ago (Afl. 714). This deficit is the second highest registered over a period of six (6) years for the month October.

Table 3 Monthly income surplus/deficit (in Afl.) for a single adult household for October, 2018 - 2023

Period	1 adult	Minimum wage	Surplus/deficit
2018	2,208	1,711	-497
2019	2,332	1,762	-570

## Change in prices of crude oil, utilities, gasoline and diesel in October 2023

The prices of utilities (electricity and water), gasoline and diesel are for the greater part determined by international crude oil prices. In October 2023 the average price per barrel of crude oil (US\$ 85.94) had a decrease of US\$ 2.17 (-2.5%) compared to September 2023 (US\$ 88.11).

The prices of electricity and water did not change compared to September 2023. Subsequently, the average electricity price per household remained at Afl. 274.57, while the average price of water per household remained at Afl. 168.73.

In October 2023 the price of gasoline registered a decrease of Afl. 5.80 cents (-2.0%) and had an effect of -0.11 pts on the CPI. The price of diesel registered an increase of Afl. 9.10 cents (3.6%) and had an effect of 0.01 ppt on the CPI of October 2023.

In October 2023, utilities, gasoline and diesel as a group, showed a decrease in price of 0.5% compared to September 2023, and had an influence of -0.10 pts on the CPI, while the remaining 404 goods and services, as a group, show an increase of 0.3% and had an effect of 0.23 pts on the CPI.

## Change in prices of Food & catering services in October 2023

The “Food & catering services” index showed an increase of 0.1% in October 2023, after an increase of 0.6% in September 2023. The index for “Food at home” showed an increase of 0.2% in October, as eight (8) of the eleven (11) “Food at home” indices increased in October 2023. The “Vegetables” index registered the largest increase (0.9%) in October 2023. Furthermore, other increases were posted in the indices for “Bread and cereals” (0.7%) and “Fruit” (0.6%).

The largest decrease was registered in the index for “Potatoes and other tubers” (-2.2%) in October 2023.

The index for “Food away from home” shows a slight decrease of 0.01% in October 2023.

In October 2023, “Food at home” and “Food away from home” as a group showed an increase in price of 0.1% compared to September 2023, and had an effect of 0.02 ppts on the CPI, while the remaining goods and services, as a group, experienced an increase in price of 0.1%, causing an effect of 0.11 ppts on the CPI.

## CPI for the period October 2022 – October 2023

### Consumer Price Index

Over the last 12 months, the CPI increased by 1.7%. Nine (9) of the twelve (12) sectors registered increases in prices. The increases that had the greatest influence on the CPI were registered for the “Communications” (6.8%), “Food and non-alcoholic beverages” (3.6%), “Miscellaneous goods and services” (3.3%), “Housing” (1.4%) and “Restaurants and hotels” (7.7%) sectors, which contributed with an effect of 0.53, 0.41, 0.38, 0.37 and 0.35 ppts, respectively. The increases in the remaining sectors had an effect of 0.50 ppts on the CPI of October 2022 - October 2023.

Aforementioned increases were partially offset, mainly by a decrease in the index for the “Recreation and culture” (-6.3%) sector, causing an effect of -0.60 ppts.

The increase in the “Communications” sector was due to an increase in the category “Telephone and telefax services” (7.9%), which contributed to an effect of 0.59 ppts. The increase in the “Food and non-alcoholic beverages” sector was mainly due to an increase in the category “Food” (3.4%), which contributed to an effect of 0.34 ppts. The increase in the “Miscellaneous goods and services” sector was mainly due to an increase in the category “Personal care” (5.4%), which contributed to an effect of 0.21 ppts. The increase in the “Housing” sector was mainly due to an increase of 13.8% in the category “Maintenance and repair of the dwelling”, which contributed to an effect of 0.71 ppts. The increase in the “Restaurants and hotels” sector was due to an increase in the category “Catering services” (8.2%), which contributed to an effect of 0.37 ppts.

The decrease in the “Recreation and culture” sector was mainly due to a decrease in the category “Holidays” (-18.2%), which contributed to an effect of -0.52 ppts.

### Consumption basket

Over the last year 59.1% of the products in the consumption basket had an increase in price, causing an effect of 5.43 ppts, while 35.8% showed a decrease, contributing to an effect of -3.70 ppts and the remaining 5.1% had no change in price. The prices of goods increased by 0.3% and caused an influence of 0.16 ppts. The prices of services showed an increase of 3.9% and had an influence of 1.58 ppts.

### Subsistence level

Over the last 12 months, the subsistence level for a household consisting of two (2) adults and two (2) children (aged 0-15 years) registered an increase of Afl. 121, from Afl. 5,311 in October 2022 to Afl. 5,432 in October 2023. This increase was mainly due to an increase in the “Food and non-alcoholic beverages” (Afl. 79) sector.

### Change in prices of crude oil, utilities, gasoline and diesel

The average price per barrel of crude oil registered a decrease of US\$ 1.67 (-1.9%) from US\$ 87.61 in October 2022 to US\$ 85.94 in October 2023.

The energy index decreased by 0.7% over the past 12 months and had an influence of -0.13 ppts. The index of “Gasoline” (9.0%) registered an increase over the last year, contributing with an effect of 0.44 ppts, while the index of “Diesel” registered an increase of 0.5% over the last year and contributed with an insignificant effect on the yearly CPI. The index of “Electricity” (-6.8%) registered a decrease over the last year, contributing with an effect of -0.57 ppts, while the index of “Water” did not register any change over this period. The remaining 404 goods and services, as a group, show an increase of 2.3% and had an effect of 1.86 ppts on the CPI.

### Change in prices of Food & catering services

Over the last 12 months, the “Food & catering services” increased by 4.9%. The “Food at home” index showed an increase of 3.6%, where six (6) of the “Food at home” food groups increased over the period.

The “Sugar, jam, honey and other confectionery” index increased by 14.5%, the largest increase among the “Food at home” food groups. Furthermore, other increases were posted in the indices for “Food products n.e.c.” (11.5%), “Bread and cereals” (8.7%), “Milk, cheese and eggs” (6.3%), “Non-alcoholic beverages” (5.4%) and “Vegetables” (1.9%). The largest decrease was registered in the index for “Potatoes and other tubers” (-3.5%) in October 2023.

The index for “Food away from home” increased by 8.2% over the last 12 months.
