

Consumer Price Index, base period June 2019

February 2024

The Central Bureau of Statistics presents the most important findings for the Consumer Price Index (CPI) for the month of February 2024.

Consumer Price Index for the month of **February 2024**

The CPI for February 2024 (108.57), shows an increase of 0.2% compared to the index of January 2024 (108.31).

The percentage change of the CPI over the last twelve (12) months (February 2023 to February 2024) is 0.9, a decrease of 6.2 percentage points (ppts) compared to the percentage change for the same period of last year (7.1%).

The period average (last 24 months) percentage change of the CPI for the periods February 2022 to February 2023 and February 2023 to February 2024 is 2.4%, a decrease of 3.7 ppts compared to the period average percentage change over the periods February 2021 to February 2022 and February 2022 to February 2023 (6.1%).

During this month, five (5) of the twelve (12) sectors registered increases in prices. The increases that had the greatest influence on the CPI were registered for the "Transport" (2.5%), "Clothing and footwear" (5.1%) and "Household operation" (1.2%) sectors, which contributed with an effect of 0.31, 0.11 and 0.11 ppts, respectively. The increases in the remaining sectors had an effect of 0.03 ppts on the CPI of February 2024.

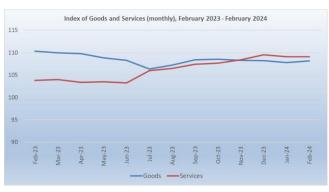

Aforementioned increases were partially offset mainly by a decrease in the index for the "Recreation and culture" (-1.4%) sector, which caused an effect of -0.13 ppts. The decreases in the remaining sectors had an effect of -0.20 ppts on the CPI of February 2024.

The increase in the "Transport" sector was mainly due to an increase in the category "Operation of personal transport equipment" (4.0%), which contributed to an effect of 0.31 ppts. The increase in the "Clothing and footwear" sector was mainly due to an increase of 4.2% in the category "Clothing", which contributed to an effect of 0.07 ppts. The increase in the "Household operation" sector was mainly due to increases in the categories "Household appliances" (5.8%) and "Goods and services for routine household maintenance and cleaning" (3.3%), which contributed each with an effect of 0.14 ppts.

The decrease in the "Recreation and culture" sector was mainly due to decreases in the categories "Holidays" (-3.0%) and "Newspapers, books and stationery" (-17.5%), which contributed to an effect of respectively, -0.08 and -0.07 ppts.

Consumption basket

The consumption basket of the CPI consists of 408 goods and services. Compared to January 2024, 42.6% of these products had an increase in price, causing an effect of 1.04 ppts, while 41.9% showed a decrease, contributing to an effect of -0.80 ppts and the remaining 15.4% had no change in price. The prices of goods (0.4%) and services (0.04%) increased and caused an influence of respectively, 0.22 and 0.02 ppts on the CPI of February 2024.

Core inflation

The CPIC (core inflation) - CPI excluding the effect of energy and food – was 2.7% in February 2024. The energy index - which consists of the products: electricity, water, gasoline and diesel – was 0.3%. The food index showed an increase of 4.7%.

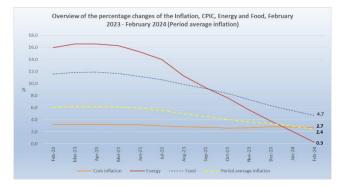

What is CPIC?

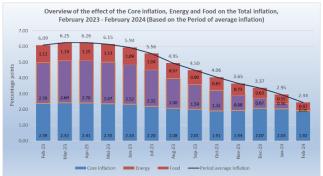

The CPIC (core inflation) is a portion of the inflation where certain items, which have volatile price movements are excluded, such as food products and energy. When calculating the core inflation, the most volatile components are eliminated from the inflation. The core inflation index is used to assess the medium and long-term trends of the general level of prices. For purposes of economic policy-making, especially monetary policy, many economists focus on the proportion of the core inflation, as this allows a more in-depth evaluation of the recent inflation developments in the economy. The annual average of the CPI is used to calculate the CPIC.

The CPIC is calculated by comparing the average index for the most recent 12-month period compared with the preceding 12-month period.

The three main uses of a CPI are:

- 1. a calculation method to compensate employees due to the loss of purchasing power, adjusting their salaries, with the percentage change rate of the CPI, which is known as indexation.
- a tool used in National Accounts to adjust components of the gross domestic product (GDP) from nominal terms to real terms. (For example, by eliminating the effect of the price changes from the consumption value)
- 3. a means commonly used by governments and central banks to set inflation targets.

Subsistence level

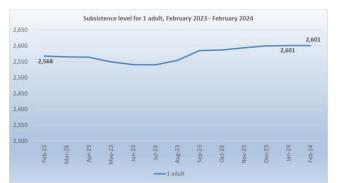

The subsistence level for a household consisting of two (2) adults and two (2) children (aged 0-15 years) (Afl. 5,462) and the one for a single adult household (Afl. 2,601) were virtually unchanged in February 2024 compared to January 2024.

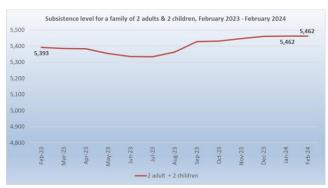

What is the Subsistence level and how is it adjusted?

The CBS defines the subsistence level as the minimum level of income that is perceived as necessary for a person or family to be able to function in the society in an adequate and socially acceptable manner. When the definition of subsistence level is used, it refers in reality to a "Social subsistence level" and not the literal definition "the money needed to purchase those goods and services deemed necessary for living a life free of basic deprivation" (United Nations).

A subsistence level index was created by calculating the cost of the essential resources that an average adult consumes during a month. Each month this index is adjusted, based on the prices of food, clothing, shelter, transportation, and other items in the basket.

The current subsistence level is based on the "Subsistence level 2010" report published by the CBS in December 2010, and is updated monthly according to the CPI. The reference unit used in this report is of a household consisting of two adults and two children (0 to 14 years). The total weight of such household is 2.1 (1.0 + 0.5 + 0.3 + 0.3).

The subsistence level in February 2024

The subsistence level is the minimum level of income which is perceived necessary to achieve an adequate standard of living in a given country. The subsistence level is usually determined by estimating the cost of all the essential resources that an average adult consumes in one month or year. This is commonly called a basic needs index, and varies according to the price of food, clothing, housing, transport and other items in the "basket". Equivalent scales are used to adjust the assumed standard of living, of households of different sizes and composition. The scale assigns a weight of 1.0 for the first adult and 0.5 for each additional adult in the household (aged 15+) and a weight of 0.3 for each child (aged 0-14 years). The subsistence level is based on figures of the report "Bestaansminimum 2010" and is monthly updated for inflation using the monthly CPI. The reference unit used in this report is a household consisting of two (2) adults and two (2) children (aged 0-14 years).

In February 2024 the monthly subsistence level for a household consisting of two (2) adults and two (2) children (aged 0-14 years) (Afl. 5,462) showed an increase of Afl. 69 compared to February 2023 (Afl. 5,393) and was mainly caused by increases of respectively, Afl. 45 and Afl. 29 in the sectors "Food and nonalcoholic beverages" and "Communications". The largest decrease in February 2024 was registered in the sector "Transport" (Afl. - 31).

Change in prices of crude oil, utilities, gasoline and diesel in February 2024

The prices of utilities (electricity and water), gasoline and diesel are for the greater part determined by international crude oil prices. In February 2024 the average price per barrel of crude oil (US\$ 76.93) had an increase of US\$ 3.37 (4.6%) compared to January 2024 (US\$ 73.56).

The prices of electricity and water did not change compared to January 2024. Subsequently, the average electricity price per household remained at Afl. 274.57, while the average price of water per household remained at Afl. 168.73.

In February 2024 the price of gasoline registered an increase of Afl. 12.50 cents (5.4%) and had an effect of 0.24 ppts on the CPI. The price of diesel registered an increase of Afl. 14.20 cents (6.6%) and had an effect of 0.02 ppts on the CPI of February 2024.

In February 2024, utilities, gasoline and diesel as a group, showed an increase in price of 1.6% compared to January 2024, and had an influence of 0.26 ppts on the CPI, while the remaining 404 goods and services, as a group, show a slight decrease of 0.02% and had an effect of -0.02 ppts on the CPI.

Change in prices of Food & catering services in February 2024

The "Food & catering services" index showed a decrease of 0.5% in February 2024, after an increase of 1.0% in January 2024. The index for "Food at home" showed a decrease of 0.7% in February, as seven (7) of the eleven (11) "Food at home" indices decreased in February 2024. The "Fruit" index registered the largest decrease (-5.0%) in February 2024. Furthermore, other significant decreases were posted in the indices for "Vegetables" (-2.5%), "Potatoes and other tubers" (-1.7%) and "Milk, cheese and eggs" (-0.9%).

The largest increase in February 2024 was registered for the index of "Sugar, jam, honey and other confectionery" (0.7%).

The index for "Food away from home" shows an increase of 0.1% in February 2024, the same increase as in January 2024.

In February 2024, "Food at home" and "Food away from home" as a group showed a decrease in price of 0.5% compared to January 2024, and had an effect of -0.08 ppts on the CPI, while the remaining goods and services, as a group, experienced an increase in price of 0.4%, causing an effect of 0.32 ppts on the CPI.

CPI for the period February 2023 – February 2024

Consumer Price Index

Over the last 12 months, the CPI increased by 0.9%. Eight (8) of the twelve (12) sectors registered increases in prices. The increases that had the greatest influence on the CPI were registered for the "Communications" (20.8%), "Miscellaneous goods and services" (2.4%), "Education" (24.8%), "Food and non-alcoholic beverages" (2.0%), "Restaurants and hotels" (4.4%) and "Housing" (0.8%) sectors, which contributed with an effect of respectively, 1.52, 0.28, 0.24, 0.24, 0.21 and 0.21 ppts. The increases in the remaining sectors had an effect of 0.09 ppts on the CPI of February 2023 - February 2024.

Aforementioned increases were partially offset, mainly by a decrease in the index for the "Transport" (-9.0%) sector, causing an effect of -1.26 ppts.

The increase in the "Communications" sector was mainly due to an increase in the category "Telephone and telefax services" (21.1%), which contributed to an effect of 1.48 ppts. The increase in the "Miscellaneous goods and services" sector was mainly due to an increase in the category "Personal care" (4.5%), which contributed to an effect of 0.18 ppts. The increase in the "Education" sector was due to increases in the categories "Secondary education" (32.0%) and "Pre-primary and primary education" (42.9%), which contributed to an effect of respectively, 0.14 and 0.10 ppts. The increase in the "Food and non-alcoholic beverages" sector was mainly due to an increase in the category "Food" (1.8%), which contributed to an effect of 0.18 ppts. The increase in the "Restaurants and hotels" sector was due to an increase of 4.8% in the category "Catering services", which contributed to an effect of 0.22 ppts. The increase in the "Housing" sector was mainly due to an increase in the category "Maintenance and repair of the dwelling" (11.9%), which contributed to an effect of 0.62 ppts.

The decrease in the "Transport" sector was mainly due to a decrease in the category "Purchase of vehicles" (-18.0%), which contributed to an effect of -0.89 ppts.

Consumption basket

Over the last year 54.2% of the products in the consumption basket had an increase in price, causing an effect of 4.41 ppts, while 39.2% showed a decrease, contributing to an effect of -3.50 ppts and the remaining 6.6% had no change in price. The prices of goods decreased by 1.9% and caused an influence of -1.15 ppts. The prices of services showed an increase of 5.1% and had an influence of 2.06 ppts.

Subsistence level

Over the last 12 months, the subsistence level for a household consisting of two (2) adults and two (2) children (aged 0-15 years) registered an increase of Afl. 69, from Afl. 5,393 in February 2023 to Afl. 5,462 in February 2024. This increase was mainly due to increases in the "Food and non-alcoholic beverages" (Afl. 45) and "Communications" (Afl. 29) sectors.

Change in prices of crude oil, utilities, gasoline and diesel

The average price per barrel of crude oil registered a slight decrease of US\$ 0.06 (-0.1%) from US\$ 76.99 in February 2023 to US\$ 76.93 in February 2024.

The energy index decreased by 5.2% over the past 12 months and had an influence of -0.94 ppts. The indices of "Gasoline" (-6.5%) and "Diesel" (-12.5%) registered decreases over the last year, contributing with an effect of respectively, -0.33 and -0.05 ppts on the yearly CPI. The index of "Electricity" (-6.8%) registered a decrease over the last year, contributing with an effect of -0.57 ppts, while the index of "Water" did not register any change over this period. The remaining 404 goods and services, as a group, show an increase of 2.3% and had an effect of 1.86 ppts on the CPI.

Change in prices of Food & catering services

Over the last 12 months, the "Food & catering services" increased by 2.8%. The "Food at home" index showed an increase of 2.0%, where eight (8) of the "Food at home" food groups increased over the period.

The "Sugar, jam, honey and other confectionery" index increased by 12.0%, the largest increase among the "Food at home" food groups. Furthermore, other significant increases were posted in the indices for "Food products n.e.c." (9.1%), "Bread and cereals" (4.3%), "Non-alcoholic beverages" (3.8%), and "Milk, cheese and eggs" (2.0%). The largest decrease during this period was registered in the index for "Fish and other seafood" (-2.1%).

The index for "Food away from home" increased by 4.8% over the last 12 months.

¹ Average West Texas Intermediate (WTI) crude oil price per barrel in US\$ (Source: U.S. Energy Information Administration)

² Total energy charge in Afl. cents per kWh

³ Fixed charge was introduced in October 2014 at Afl. 2.50

⁴ Electricty price in Afl. is based on an average household usage of 725.5 kWh

⁵ Water price in Afl. is based on an average household usage

⁶Gasoline and diesel prices in Afl. cents per liter
