Trade and Industry

September 2024

Central Bureau of Statistics Aruba

Foreign Trade Statistics, Month in review

The Central Bureau of Statistics hereby presents the most important preliminary findings regarding Foreign Trade for the month September of 2024. This review will focus only on the monetary value of the imported and exported goods. Quantity information (weight in kilograms) will be provided in the quarterly foreign trade statistics publications.

The following findings are presented in this monthly review:

Imports

- Import to the free circulation area of Aruba by section
- Import to the Free Zone Aruba by section
- Total import by section
- Import to the free circulation area of Aruba by most important countries
- Import to the free circulation area of Aruba by segment

Exports

- Export from the free circulation area of Aruba by section
- Export from the Free Zone Aruba by section
- Total export by section
- Export from the free circulation area of Aruba by most important countries
- Export from the free circulation area of Aruba by segment

Table of contents

Introduction

	Page
1. Import and export tables by section	
• Total imports and exports to or from Aruba by section, September 2023 - 2024	1
• Total imports and exports to or from the free circulation area of Aruba by section. Monthly, Year to date, End of Period and Period Average changes for September 2024	2
• Total imports and exports to or from Aruba by section. Monthly, Year to date, End of Period and Period Average changes for September 2024	3
• Total imports and exports to or from the free circulation area of Aruba by section, September 2020 - 2024	4
• Total imports and exports for the last five years (2020-2024) to or from the Free Circulation Area of Aruba and the Free Zone by Section, in mln. Afl (January up to September)	5
2. Import and export tables by most important countries	
• Total imports and exports to or from Aruba by most important countries, September 2023 - 2024	6
• Total imports and exports to or from the free circulation area of Aruba by most important countries. Monthly, Year to date, End of Period and Period Average changes for September 2024	7
• Total imports and exports to or from Aruba by most important countries. Monthly, Year to date, End of Period and Period Average changes for September 2024	8
• Total imports and exports to or from the free circulation area of Aruba by most important countries, September 2020 - 2024	9
• Total imports and exports for the last five years (2020-2024) to or from the Free Circulation Area of Aruba and the Free Zone by most important countries, in mln. Afl (January up to September)	10
3. Import and export tables by segment	
• Total imports to the free circulation area of Aruba by segment. Monthly, Year to date, End of Period and Period Average changes for September 2024	11
• Total imports to the free circulation area of Aruba by segment, September 2020 - 2024	12
• Total exports to the free circulation area of Aruba by segment. Monthly, Year to date, End of Period and Period Average changes for September 2024	13
• Total exports to the free circulation area of Aruba by segment, September 2020 - 2024	14
• Total imports for the last five years (2020-2024) to the Free Circulation Area of Aruba and the Free Zone by segment, in mln. Afl (For the month September)	15
• Total exports for the last five years (2020-2024) from the Free Circulation Area of Aruba and the Free Zone by segment, in mln. Afl (January up to September)	16
Annexes	
1. Graph 1. Total imports to the free circulation area of Aruba by section, 2020 - 2024	17
2. Graph 2. Total exports from the free circulation area of Aruba by section, 2020 - 2024	19
3. Harmonized commodity group codes and classification by sections and chapters	21

Introduction

Purpose of this monthly review

Governments, organizations and individuals recognize the importance of using statistical findings to make evidence based decisions. Therefore, it is important to make official statistics available to all users, soon after the end of the reference period. The main purpose of this monthly review is to improve the timeliness in the dissemination of international merchandise trade statistics, by publishing on a monthly basis provisional estimates of total imports and exports. When new and more accurate information becomes available, these provisional figures are revised for the benefit of users. This review is divided in 3 parts and presents the trade statistics for September 2024 compared to August 2024, December 2023 and September 2023. Trade data (January up to September) for the years 2020 through 2024 is also presented in this review. The estimates of total imports and exports are presented by:

- Sections and groups (Part 1);
- Major partner countries (Part 2);
- Food and non-food products (segments) (Part 3);
- Followed by the annexes.

The Harmonized System

Since January 2009, the CBS has been processing trade data (customs records) according to the Harmonized System (HS), which is an international nomenclature for the classification of products. It allows countries to classify traded goods on a common basis for customs purposes. It has around 5,300 product descriptions that appear as headings and subheadings, arranged in 99 chapters, grouped in 21 sections. The CBS furtherly aggregated the 21 sections into 5 groups. At the international level, the HS for classifying goods is a six-digit code system. The HS enables international comparability of trade statistics. To satisfy user needs, the CBS also created a food and non-food classification of products (segments) using the HS six-digit code system. For an overview of the 5 groups, 21 sections and 99 chapters refer to Appendix 3.

The statistical territory

The statistical territory of Aruba, the territory with respect to which trade data are being compiled, consists of the free circulation area and the Free Zone (FZ). The free circulation is defined as the area where imported goods are allowed to enter, upon the payment of import duties and taxes and the accomplishment of all the necessary Customs formalities. Once these goods enter (imports) or leave (exports) our economic territory, they will add or subtract to the stock of our material resources. Whereas, goods that enter the FZ are considered to be outside of the customs territory and do not have to pay import duties and taxes and do not add or subtract to the stock of material resources of our country. FZ's are usually used to improve the packaging or marketable quality of goods or just prepare them for further shipment.

Partner country attribution

Trade statistics by partner country are of significant analytical value and are used among other things for: the analysis of economic trends and regional trade patterns, the calculation of trade shares, make business decisions and the compilation of national accounts and balance of payments. The International Merchandise Trade Statistics (IMTS) recommends that imports be attributed to the country of origin of the goods, meaning the country in which goods were produced or manufactured. In the case of exports, it is recommended to record the country of last known destination. The information found on the Customs declarations was used to identify the country of origin for imports and the country of last known destination for exports.

Statistical value of traded goods

The statistical value of traded goods, is the value assigned to goods by the compiler of trade statistics. The imported goods are valued using the cost, insurance and freight valuation type (CIF), while the exported goods are valued using the free on board valuation type (FOB). The CIF consists of three components, while the FOB comprises only of components (1) and (2). These components are:

1. The transaction value of the goods;
2. The value of services performed to deliver the goods to the border of the exporting country;
3. The value of the services performed to deliver the goods from the border of the exporting country to the border of the importing country.

Costs that fall under component (2) are costs that occur while the goods are in the exporting country. These costs are:

1. Cost of loading;
2. Cost of transportation;
3. Cost of insurance;
4. Cost of customs clearance.

Costs that fall under component (3) are costs that occur while the goods are in international carriage. These costs are:

1. Cost of transportation;
2. Cost of insurance.

Total Imports and Total Exports include all goods entering or leaving Aruba.

Data for the years 2023 and 2024 should still be considered as provisional.

[,] is used to indicate that the value is equal to zero.

The symbol [-] is used to indicate that a formula attempted to divide a value by zero.

Total Imports and Total Exports include all goods entering or leaving the free circulation area of Aruba (The Free Zone is excluded).

The monthly change is calculated by comparing the latest month with the previous month.

The year to date change is calculated by comparing the latest month with December of the previous year.

The last 12 months change is calculated by comparing the latest month with the same month one year ago.

The last 24 months change is calculated by comparing the average for the most recent 12-month period compared with the average of the preceding 12-month period.

Data for the years 2023 and 2024 should still be considered as provisional.

[,] is used to indicate that the value is equal to zero.

The symbol [-] is used to indicate that a formula attempted to divide a value by zero.

Total Imports and Total Exports include all goods entering or leaving Aruba.

The most important countries have been chosen based on the highest average Imports and Exports in Afl of the years 2020-2023.

Data for the years 2023 and 2024 should still be considered as provisional.

Country of origin refers to the country in which the imported goods were produced or manufactured.

Country of last known destination refers to the last country, as far as it is known at the time of exportation, to which the goods are to be delivered.

[.] is used to indicate that the value is equal to zero.

The symbol [-] is used to indicate that a formula attempted to divide a value by zero.

Total Imports and Total Exports include all goods entering or leaving the free circulation area of Aruba (The Free Zone is excluded).

The most important countries have been chosen based on the highest average Imports and Exports in Afl of the years 2020-2023.

The monthly change is calculated by comparing the latest month with the previous month.

The year to date change is calculated by comparing the latest month with December of the previous year.

The last 12 months change is calculated by comparing the latest month with the same month one year ago.

The last 24 months change is calculated by comparing the average for the most recent 12-month period compared with the average of the preceding 12-month period.

Data for the years 2023 and 2024 should still be considered as provisional.

Country of origin refers to the country in which the imported goods were produced or manufactured.

Country of last known destination refers to the last country, as far as it is known at the time of exportation, to which the goods are to be delivered.

[,] is used to indicate that the value is equal to zero.

The symbol [-] is used to indicate that a formula attempted to divide a value by zero.

Source: Central Bureau of Statistics Aruba

Total Imports and Total Exports include all goods entering or leaving Aruba.

The most important countries have been chosen based on the highest average Imports and Exports in Afl of the years 2020-2023.

The monthly change is calculated by comparing the latest month with the previous month.

The year to date change is calculated by comparing the latest month with December of the previous year.

The last 12 months change is calculated by comparing the latest month with the same month one year ago.

The last 24 months change is calculated by comparing the average for the most recent 12-month period compared with the average of the preceding 12-month period.

Data for the years 2023 and 2024 should still be considered as provisional.

Country of origin refers to the country in which the imported goods were produced or manufactured.

Country of last known destination refers to the last country, as far as it is known at the time of exportation, to which the goods are to be delivered.

[,] is used to indicate that the value is equal to zero.

The symbol [-] is used to indicate that a formula attempted to divide a value by zero.
