A note to the reader

The following report presents the price statistics for February 2025.

- At the end of February 2025, the Consumer Price Index (CPI) shows an increase of 0.4% compared to the index of January 2025. The sector which affected the CPI the most was “Transport” (2.0%), which led to an effect of 0.25 percentage points (ppts) on the Δ CPI of February 2025 (0.4%).
- Compared to February 2024 the CPI increased by 0.5%. The sector which affected the CPI the most was “Transport” (4.0%), which led to an effect of 0.50 ppts.
- The period average inflation for the periods February 2022 to February 2023 and February 2024 to February 2025 is 1.6%, which is 0.8 ppts lower compared to the period average inflation for the periods February 2021 to February 2022 and February 2022 to February 2023 (2.4%).
- The monthly subsistence level for a household consisting of two (2) adults and two (2) children (aged 0-14 years) increased by Afl. 32, from Afl. 5,462 in February 2024 to Afl. 5,494 in February 2025.
- Utilities (Water and Electricity) did not register price changes in February 2025. The price of gasoline registered an increase of 3.5% in February 2025 and had an effect of 0.16 ppts Δ CPI of February 2025. The price of diesel registered an increase of 6.5% in February 2025 and had an effect of 0.02 ppts on the Δ CPI of February 2025.

This report is divided in 7 sections. An overview of the monthly percentage changes in the CPI and index per sector is presented in section 1. Section 2 provides the yearly percentage changes in the CPI and index per sector. The development of indices of main sectors and utilities is outlined in section 3. Section 4 presents the percentage change in the CPI of Aruba’s major trading partners and compares the CPI of Aruba and the USA. Section 5 presents an overview of the monthly and yearly percentage changes of the core inflation. Section 6 presents the price movements in food & catering services. The development of the subsistence level is presented in section 7 and is followed by the appendices.

1 Monthly change of the CPI

1.1 CPI and Inflation

The CPI of the total population of Aruba for the month of February 2025 is 109.09; an increase of 0.4% compared to the CPI of January 2025 (108.31). An overview of the percentage change in the CPI (Δ CPI) for different periods during 2024 and 2025 is shown in Table 1. The terms percentage change in the CPI and “inflation” (deflation) are considered similar and are used interchangeably. The inflation over the last 12 months (end of period inflation) is 0.5%, while the inflation over a period of 24 months (period average inflation) is 1.6%.

Table 1: Overview of Δ CPI

Period		% Changes		Index	
		2024	2025	Last	Current
Monthly	Jan - Feb	0.2	0.4	108.31	109.09
Year-to-date	Dec - Feb	-0.2	0.02	109.07	109.09
Last 12 months ¹	Feb - Feb	0.9	0.5	108.57	109.09
Last 24 months ²	Feb - Feb	2.4	1.6	107.56	109.25

Source: Central Bureau of Statistics Aruba

¹ End of period inflation

² Period average inflation

Figure 1 depicts the monthly Δ CPI over a period of one year starting from February 2024, whereas the Δ CPI for the month February for the years 2016 to 2025 is illustrated in Figure 2.

1.2 Changes in sector

Figure 3 provides an overview of the percentage changes for the indices per sector for February 2025. The percentage change in index is further denoted as Δ I. The largest Δ I is observed for the “Clothing and footwear” sector with a decrease of 7.0%.

1.3 Changes in categories and subcategories

The largest positive and negative Δ I is seen in the categories “Other major durables for recreation and culture” (22.7%) and “Accommodation services” (-50.0%). In the “Food and non-alcoholic beverages” sector a decrease was observed for the category “Food” (-0.4%), while the category “Non-alcoholic beverages” showed an increase of 0.2%. In the “Housing” sector the major Δ I is observed for the category “Electricity, gas and other fuels” (1.5%). In the “Transport” sector the major Δ I is observed for the category “Transport services” (-4.0%). In the “Recreation and culture” sector the major Δ I is observed for the category “Other major durables for recreation and culture” (22.7%)¹.

The categories which influenced the CPI calculation the most are “Operation of personal transport equipment”, “Electricity, gas and

other fuels”, “Holidays”, which had an effect of respectively, 0.25, 0.12 and 0.12 ppts on the Δ CPI. Reference is made to tables 16 and 17 in Appendices 1 and 2. Table 16 provides an overview of the indices for the months February 2024, January 2025 and February 2025 together with corresponding weights per sector and the monthly, year-to-date (ytd), end of period and period average percentage changes for February 2025. In table 17 an overview of the effect on the monthly, year-to-date (ytd), end of period and period average CPI per sector and category for February 2025 is presented. The course of indices for 2012 – up to February 2025 is illustrated in Appendix 5.

Figure 1: Monthly Δ CPI, 2024 - 2025

Figure 2: Monthly Δ CPI for February, 2016 - 2025

Figure 3: Δ I per sector, February 2025

¹ The focus is on the four major sectors which are: Housing, Transport, Food and non-alcoholic beverages and Recreation and culture. Together these sectors form 59% of the total weight of the basket of goods and services.

2 End of period change of the CPI

2.1 End of period change CPI for February 2025

The CPI increased from 108.57 in February 2024 to 109.09 in February 2025, an increase of 0.5%. This Δ CPI is the second lowest registered over a period of 6 years for the month February, and is 0.4 pts lower than the Δ CPI registered in 2024 (0.9%) (see table 2).

Table 2: End of period Δ CPI for February, 2020 - 2025

Period	Δ CPI	Index
2019-2020	2.3	98.90
2020-2021	-1.9	97.00
2021-2022	3.5	100.44
2022-2023	7.1	107.59
2023-2024	0.9	108.57
2024-2025	0.5	109.09

Source: Central Bureau of Statistics Aruba

2.2 Changes in sector

An overview of the percentage change and effect per sector over the period February 2024 - February 2025 is presented in table 3. The largest Δ I is observed for the sector "Transport" with an increase of 4.0%. Furthermore, other significant increases are observed for the "Restaurants and hotels" (2.4%), "Miscellaneous goods and services" (1.4%), "Communications" (1.3%) and "Food and non-alcoholic beverages" (1.1%) sectors. A comparison of the Δ I's for the years 2024 and 2025 is provided in figure 4.

Table 3: Percentage change and effect for February, 2024 - 2025

Sector	% Change	Effect
Food and non-alcoholic beverages	1.1	0.13
Alcoholic beverages and tobacco	0.0	0.00
Clothing and footwear	-1.8	-0.04
Housing	-0.1	-0.01
Household operation	-2.3	-0.21
Health	0.3	0.01
Transport	4.0	0.50
Communications	1.3	0.12
Recreation and culture	-3.4	-0.31
Education	0.0	0.00
Restaurants and hotels	2.4	0.12
Miscellaneous goods and services	1.4	0.17
CPI	0.5	0.48

Source: Central Bureau of Statistics Aruba

2.3 Changes in categories

The largest positive and negative Δ I in categories observed over a period of one year are respectively, "Telephone and telefax equipment" (38.0%) and "Accommodation services" (-18.0%). For an overview of the end of period percentage changes per category refer to table 16 in Appendix 1.

2.4 End of year change CPI 2016 - 2025

The end of year Δ CPI for the period 2016 - 2025 is shown in figure 5. The Δ CPI for 2025 is calculated by comparing the CPI of February 2025 with the CPI of January 2025. The ytd Δ CPI for February 2025 is 0.02%.

2.5 Period average change CPI for February 2025

The period average change CPI (Δ ACPI) for February 2025 is 1.6%. Table 4 provides an overview of the Δ ACPI for the month February for the years 2021 to 2025. The Δ ACPI for 2025 decreased by 0.8 pts compared to 2024 (2.4%).

Table 4: Overview of Δ ACPI for February, 2021 - 2025

Period	Δ ACPI	Index
2020-2021	-2.2	97.30
2021-2022	1.7	98.96
2022-2023	6.1	104.99
2023-2024	2.4	107.56
2024-2025	1.6	109.25

Source: Central Bureau of Statistics Aruba

3 Development of indices of main sectors and utilities

3.1 Indices main sectors

The four major sectors, “Housing”, “Transport”, “Food and non-alcoholic beverages” and “Recreation and culture”, constitute 58% of the total weight of the basket of goods and services, which are observed on a monthly basis. An overview of the course of indices for 2010 – up to February 2025 per sector and for the CPI is provided in figures 9-1 to 9-12 in Appendix 5.

Changes in the indices of the sectors “Housing” and “Transport” are mainly the result of changes in the international oil prices and prices of utilities during the respective months. The development of crude oil, fuel surcharge, electricity, water, gasoline and diesel prices is provided in table 5 and in the adjoining figures 6-1 and 6-2.

Table 5: Prices of utilities, gasoline and diesel, 2024 - 2025

Month	Crude oil per barrel ¹	Total energy charge ² ≤ 500 kWh	Total energy charge ² 501-1000 kWh	Electricity ³	Water ⁴	Gasoline ⁵	Diesel ⁵

¹ Average West Texas Intermediate (WTI) crude oil price per barrel in US\$ (Source: U.S. Energy Information Administration)

² Total energy charge in Afl. cents per kWh

³ Electricity price in Afl.

⁴ Water price in Afl.

⁵ Gasoline and diesel prices in Afl. cents per liter

3.2 Electricity

The price of electricity is determined in Aruban florins (Afl.) for an average usage by households. The average usage is 725.5 kWh per month. The electricity price for an average consumption of 725.5 kWh did not change in February 2025, it remained at Afl. 263.67. Figure 6-1 provides an overview of the course of changes in the electricity price for the period 2016 to 2025.

The total energy charge per kWh for a usage of electricity up to 500 kWh did not change in February 2025, it stayed at Afl. 34.31 cents per kWh. The total energy charge per kWh for a usage of electricity between 501 - 1000 kWh did not change in February 2025, it stayed at Afl. 35.31 cents per kWh.

3.3 Water

The price of water is determined in Afl. for an average usage (water consumption) by households. Figure 6-1 provides an overview of the course of changes in the water price for the period 2016 to 2025. The water price for an average usage by households did not change in February 2025, it remained at Afl. 168.73.

3.4 Gasoline and Diesel

The retail price of gasoline increased by 3.5% from 233.5 cents per liter in January 2025 to 241.7 cents per liter in February 2025. In February 2025, the retail price of diesel registered an increase of 6.5% from 204.9 cents per liter in January 2025 to 218.2 cents per liter in February 2025.

Figure 6-1 Electricity price, water price and energy charge in Afl., 2016 - 2025

5 Core inflation

5.1 Core inflation

Core inflation is a measure of inflation which excludes certain items that face volatile price movements e.g. food products and energy. By calculating the core inflation these more volatile components are eliminated from the inflation. Core inflation indices serve to assess the mid- and long-term trend of the overall price level. For the purpose of adjusting monetary policy, many economists focus more intently on the core rate of inflation, as this allows for an in-depth assessment of inflationary processes ongoing in the economy.

5.2 Monthly change of the core inflation

In February 2025 the core inflation (measured over the period February 2023 - 2025) was 2.4%. In February 2025 the food index was 2.1%, while the energy index shows a decrease of 2.2%.

Table 9: Monthly inflation¹ and core inflation, 2024 - 2025

Period	Inflation	Food	Energy ²	Core Inflation
Feb-24	2.4	4.7	0.3	2.7
Mar-24	2.1	4.0	-1.1	2.6
Apr-24	1.9	3.4	-2.1	2.7

6 Development of Food & catering services

6.1 Monthly change of Food & catering services for February 2025

The “Food & catering services” index showed a decrease of 0.2% in February 2025, after having decreased 0.3% in January 2025. The index for “Food at home” showed a decrease of 0.3% in February, as five (5) of the eleven (11) “Food at home” indices decreased in February 2025. The “Vegetables” index registered the largest decrease (-4.3%) in February 2025. Furthermore, other significant decreases were posted in the indices for “Milk, cheese and eggs” (-1.1%) and “Fruit” (-0.2%).

The largest increase in February 2025 was registered for the index of “Potatoes and other tubers” (2.1%).

The index for “Food away from home” shows an increase of 0.3% in February 2025.

Table 11 provides an overview of the corresponding weights per food group together with the percentage changes and effect for February 2025.

Table 11: Percentage change of Food for February 2025

Food	Weight	Monthly		Yearly	
		% Change	Effect	% Change	Effect

Figure 11 depicts the monthly Δ Food and catering services over a period of one year starting from February 2024.

6.2 End of Period change of Food & catering services for February 2025

Over the last 12 months, the “Food & catering services” increased by 1.6%. The “Food at home” index showed an increase of 1.1%, where eight (8) of the “Food at home” food groups increased over this period.

The “Potatoes and other tubers” index increased by 2.5%, the largest increase among the “Food at home” food groups. Furthermore, other significant increases were posted in the indices for “Non-alcoholic beverages” (2.4%), “Fruit” (2.1%), “Meat” (1.9%) and “Bread and cereals” (1.6%). The largest decrease during this period was registered in the index for “Vegetables” (-3.8%).

Over the last 12 months, “Food at home” and “Food away from home” as a group showed an increase in price of 1.6% and had an effect of 0.26 ppts on the CPI, while the remaining goods and services, as a group, experienced an increase in price of 0.3%, causing an effect of 0.21 ppt on the CPI.

Table 18 provides an overview of the monthly and end of period percentage changes and effect for February 2025 for the food groups.

7 Subsistence level

7.1 Subsistence level

The subsistence level is the minimum level of income which is perceived necessary to achieve an adequate standard of living in a given country. The subsistence level is usually determined by estimating the cost of all the essential resources that an average adult consumes in one month or year. This is commonly called a basic needs index, and varies according to the price of food, clothing, housing, transport and other items in the "basket". Equivalence scales are used to adjust for the assumed standard of living, of households of different sizes and composition. The scale assigns a weight of 1.0 for the first adult and 0.5 for each additional adult in the household (aged 15+) and a weight of 0.3 for each child (aged 0-14 years). The subsistence level is based on figures of the report "Bestaansminimum 2010" published by the CBS in February 2010 and is monthly updated for inflation using the monthly CPI. The reference unit used in this report is one of a household consisting of two adults and two children (aged 0-14 years).

7.2 Monthly change of the subsistence level for February 2025

Table 13 provides an overview of the subsistence level for a family of two adults and two children (aged 0-14 years) by sector registered over a period of 5 years for the month February. Over a period of one year the subsistence level increased by Afl. 32, from Afl. 5,462 in February 2024 to Afl. 5,494 in February 2025. The "Food and non-alcoholic beverages" (Afl. 25) sector shows the largest increase, over this period.

Table 13: Monthly subsistence level in Aruba (in Afl.) by sector for a family of 2 adults and 2 children (aged 0-14 years) for February, 2021 - 2025

Sector						Change in Afl.

7.3 Comparison of the subsistence level and minimum wage

In February 2025 the subsistence level for a single adult household is Afl. 2,601, which represents an income deficit of Afl. 630, an increase of Afl. 15 compared to the deficit observed one year ago (Afl. 615). This deficit is the third highest registered over a period of six years for the month February.

Tabel 15: Monthly income surplus/deficit (in Afl.) for a single adult household for February, 2020 - 2025

Period	Minimum		Surplus/deficit
	1 adult	wage	
2020	2,303	1,815	-488
2021	2,258	1,815	-443
2022	2,348	1,815	-533
2023	2,568	1,893	-675
2024	2,601	1,986	-615
2025	2,616	1,986	-630

Course of Indices for 2012 up to February 2025

Glossary

The Consumer Price Index and Inflation

The Consumer Price Index (CPI) measures changes in prices of consumer goods and services by households. Consumer price indices can be intended to measure either the rate of price inflation or deflation as perceived by households or changes in their cost of living. In case of inflation, the percentage change is positive and it indicates a decrease in the purchasing power of the consumers.

Monthly percentage change

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of the previous month.

Year-to-date (ytd)

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of February prior to the year under review.

End of period inflation (last 12 months)

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of the same month of the previous year.

Period average inflation (last 24 months)

The period average inflation is calculated by comparing the annual average CPI of the concerning period with the annual average CPI of the concerning period of the previous year.

Effect

Contribution of all percentage changes (of all respective aggregates) to the CPI.

Core inflation

Core inflation is a measure of inflation that excludes certain items, which face volatile price movements. Core inflation eliminates the inflation of certain products that can have temporary price shocks because these shocks can diverge from the overall trend of inflation and give a false measure of inflation. The core rate of inflation is calculated by: total inflation excluding food and energy prices. In part, that is because the core is less volatile and reflects better the relationship of supply and demand in domestic product markets. The core usually is a better measure of the basic rate of inflation that will tend to emerge in the absence of supply shocks.

Food & catering services

The “Food & catering services” index is composed of the indices for the “Food & Non-alcoholic beverages” sector (“Food at home”) and the “Catering services” (“Food away from home”) category.

Subsistence level

The subsistence level is the minimum level of income, which is perceived necessary to achieve an adequate standard of living in a given country. The subsistence level is usually determined by estimating the cost of all the essential resources that an average adult consumes in one month or year. This is commonly called a basic needs index, and varies according to the price of food, clothing, housing, transport and other items in the “basket”. The subsistence level is monthly updated for inflation using the monthly CPI.
