## Note to the Reader

The following report presents the price statistics for December 2010.

- At the end of December 2010 the Consumer Price Index (CPI) experienced a minor increase of 0.04% compared to the end of November 2010. The sector which affected the CPI the most was “Transport” (-0.6%), which led to an effect of -0.10 percentage points (ppts) on the  $\Delta$  CPI of December (0.04%).
- Compared to December 2009 the CPI decreased by 0.7%. The sector which affected the CPI the most was “Housing” (2.0%). Specifically, prices of “Actual rentals for housing” and “Electricity, gas and other fuels” increased by respectively 5.6% and 2.8%. The increase in prices of these categories caused a total effect of 0.77 ppts on the end of period inflation of December (-0.7%).
- The period average inflation for the period December 2009 - December 2010 is 2.1%, which is 4.2 ppts higher compared to the period average inflation for the period December 2008 - December 2009 (-2.1%).
- Utilities (Water and Electricity) did not register price changes in December 2010. Gasoline and diesel registered price increases in December 2010. The prices of gasoline and diesel increased by respectively 1.1% and 1.9% and caused a total effect of 0.07 on the  $\Delta$  CPI of December (0.04%).

This report is divided in 5 sections. An overview of the monthly percentage changes in the CPI and index per sector is presented in section 1. Section 2 provides the yearly percentage changes in the CPI and index per sector. The development of indices of main sectors and utilities is outlined in section 3. Section 4 presents the percentage change in the CPI of Aruba’s major trading partners and compares the CPI of Aruba and the USA. Section 5 presents an overview of the monthly and yearly percentage changes of the core inflation, and is followed by the appendices.

## 1 Monthly change of the CPI

### 1.1 CPI and Inflation

The CPI of the total population of Aruba for the month of December 2010 is 114.4; an increase of 0.04% compared to the CPI of November 2010 (114.3). An overview of the percentage change in the CPI ( $\Delta$  CPI) for different periods during 2009 and 2010 is shown in Table 1. The terms percentage change in the CPI and “inflation” (deflation) are considered similar and are used interchangeably. The deflation over the last 12 months (end of period inflation) is 0.7%, while the inflation over a period of 24 months (period average inflation) is 2.1%.

Figure 1 depicts the monthly  $\Delta$  CPI over a period of one year starting from December 2009, whereas the  $\Delta$  CPI for the month December for the years 2001 to 2010 is illustrated in Figure 2.

### 1.2 Changes in sector

Figure 3 provides an overview of the percentage changes for the indices per sector for December 2010. The percentage change in index is further denoted as  $\Delta$  I. The largest  $\Delta$  I<sup>1</sup> is observed for the sector “Restaurants and hotels” (0.6%).

### 1.3 Changes in categories and subcategories

The largest positive and negative  $\Delta$  I is seen in the categories “Accommodation services” (63.7%) and “Transport services” (-5.8%), respectively. The major  $\Delta$  I in the “Food and non-alcoholic beverages” sector is observed for the category “Food” which increased by 0.5%. The major  $\Delta$  I in the “Recreation and culture” sector is observed for the category “Holidays” (14.0%), which is mainly the result of an increase in “Cruise ship, including accommodation costs and transport” of 15.9%.

The categories which influenced the CPI calculation the most are “Holidays”, “Purchase of vehicles”, “Operation of personal transport equipment” and “Transport services”, which had an effect of respectively, 0.10, -0.10, 0.07 and -0.07 ppts on the  $\Delta$  CPI. Reference is made to tables 11 and 12 in Appendices 1 and 2. Table 11 provides an overview of the indices for the months December 2009, November 2010 and December 2010 together with corresponding weights per sector and the monthly, end of period and period average percentage changes for December 2010. In table 12 an overview of the effect on the monthly, end of period and period average CPI per sector and category for December 2010

<sup>1</sup> The focus is on the four major sectors which are: Housing, Transport, Food and non-alcoholic beverages and Recreation and culture. Together these sectors form 64% of the total weight of the basket of goods and services.

is presented. The course of indices for 2005 to 2010 is illustrated in Appendix 3.

## 2 End of period change of the CPI

### 2.1 End of period change CPI for December 2010

The CPI decreased from 115.2 in December 2009 to 114.4 in December 2010, a decrease of 0.7%. This  $\Delta$  CPI is the second lowest registered over a period of 5 years for the month December, and is 7.5 pts lower than the  $\Delta$  CPI registered in 2009 (6.8%) (see table 2).

### 2.2 Changes in sector

An overview of the percentage change per sector over the period December 2009 - December 2010 is presented in table 3. The largest  $\Delta$  I is observed for the sector "Clothing and footwear" with a decrease of 7.7%. This decrease is mainly caused by a decrease in the category "Clothing" of 8.1%. The second largest  $\Delta$  I during this period is observed for the sector "Household operation" with a decrease of 2.2%. Furthermore, decreases of 2.1% and 2.0% are observed for the sectors "Restaurants and hotels" and "Transport", respectively. A comparison of the  $\Delta$  I's for the years 2009 and 2010 is provided in figure 4.

### 2.3 Changes in categories

The largest positive and negative  $\Delta$  I in categories observed over a period of one year are respectively, "Accommodation services" (19.3%) and "Telephone and telefax equipment" (-22.2%). For an overview of the end of period percentage changes per category refer to table 11 in Appendix 1.

### 2.4 End of year change CPI 2001 - 2010

The end of year  $\Delta$  CPI for the period 2001 - 2010 is shown in figure 5. The  $\Delta$  CPI for 2010 is calculated by comparing the CPI of December 2010 with the CPI of December 2009.

### 2.5 Period average change CPI for December 2010

The period average change CPI ( $\Delta$  ACPI) for December 2010 is 2.1%. Table 4 provides an overview of the  $\Delta$  ACPI for the month December for the years 2004 to 2010. The  $\Delta$  ACPI for 2010 increased by 4.2 pts compared to 2009.

## 3 Development of indices of main sectors and utilities

### 3.1 Indices main sectors

The four major sectors, "Housing", "Transport", "Food and non-alcoholic beverages" and "Recreation and culture", constitute 64% of the total weight of the basket of goods and services, which are observed on a monthly basis. An overview of the course of indices for 2005 - 2010 per sector and for the CPI is provided in figures 9-1 to 9-12 in Appendix 3.

Changes in the indices of the sectors "Housing" and "Transport" are mainly the result of changes in the international oil prices and prices of utilities during the respective months. The development of crude oil, fuel surcharge, electricity, water, gasoline and diesel prices is provided in table 5 and in the adjoining figures 6-1 and 6-2.

**Table 5: Prices of crude oil, utilities, gasoline and diesel, 2009 - 2010**

### 3.2 Electricity

The price of electricity is determined in Afl. for an average usage by households. The average usage is 725.5 kWh per month. The electricity price for an average consumption of 725.5 kWh did not change in December 2010, it remained at Afl. 308.72. Figure 6-1 provides an overview of the course of changes in the electricity price for the period 2007 to 2010.

The component in the electricity tariff which is sensitive to price changes is the fuel surcharge (brandstofclausule). Figure 6-1 shows this component of the electricity tariff in Afl. per kWh per month. The fuel surcharge component of the electricity tariff did not change in December 2010, it stayed at 26.83 cents per kWh.

### 3.3 Water

The price of water is determined in Afl. for an average usage (water consumption) by households. Figure 6-1 provides an overview of the course of changes in the water price for the period 2007 to 2010. The water price for an average usage by households did not change in December 2010, it remained at Afl. 153.95.

### 3.4 Crude oil, Gasoline and Diesel

In December 2010 the average price of crude oil increased by US\$ 5.27 per barrel compared to November. The retail price of gasoline increased by 1.1% from 195.2 cents per liter in November 2010 to 197.4 cents per liter in December 2010. In December 2010, the retail price of diesel increased by 1.9% from 170.0 cents per liter in November 2010 to 173.3 cents per liter. Figure 6-2 provides an overview of the course of changes in the average price of crude oil, the retail price of gasoline and the retail price of diesel for the period 2007 to 2010.

## 5 Core inflation

### 5.1 Core inflation

Core inflation is a measure of inflation which excludes certain items that face volatile price movements e.g. food products and energy. By calculating the core inflation these more volatile components are eliminated from the inflation. Core inflation indices serve to assess the mid- and long-term trend of the overall price level. For the purpose of adjusting monetary policy, many economists focus more intently on the core rate of inflation, as this allows for an in-depth assessment of inflationary processes ongoing in the economy.

### 5.2 Monthly change of the core inflation

In December 2010 the core inflation (measured over the period December 2009 - 2010) was -0.4%, a decline of 3.1 ppts compared to December 2009. In December 2010 the food index shows a decrease of 2.7%, while the energy index had an increase of 14.7%. Over the past year the food index declined by 7.3 ppts and the energy index increased by 34.6 ppts. Table 9 provides an overview of the monthly inflation and core inflation starting from December 2009.

## Course of Indices for 2005 - 2010

## Glossary

### **The Consumer Price Index and Inflation**

The Consumer Price Index (CPI) measures changes in prices of consumer goods and services by households. Consumer price indices can be intended to measure either the rate of price inflation or deflation as perceived by households or changes in their cost of living. In case of inflation, the percentage change is positive and it indicates a decrease in the purchasing power of the consumers.

### **Monthly percentage change**

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of the previous month.

### **Year-to-date (ytd)**

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of December prior to the year under review.

### **End of period inflation (last 12 months)**

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of the same month of the previous year.

### **Period average inflation (last 24 months)**

The end of period inflation percentage change in CPI (period average inflation) is calculated by comparing the annual average CPI of the concerning period with the annual average CPI of the concerning period of the previous year.

### **Effect**

Contribution of all percentage changes (of all respective aggregates) to the CPI.

### **Core inflation**

Core inflation is a measure of inflation that excludes certain items which face volatile price movements. Core inflation eliminates the inflation of certain products that can have temporary price shocks because these shocks can diverge from the overall trend of inflation and give a false measure of inflation. The core rate of inflation is calculated by: total inflation excluding food and energy prices. In part, that is because the core is less volatile and reflects better the relationship of supply and demand in domestic product markets. The core usually is a better measure of the basic rate of inflation that will tend to emerge in the absence of supply shocks.
