## A note to the reader

The following report presents the price statistics for January 2022.

- The Central Bureau of Statistics made a series of improvements in October 2020 to keep the measures on changes in consumer prices as accurate and up to date as possible. Due to the implementation of these important changes in the calculation of the CPI, the CPI from June 2019 up to September 2020 were revised and corrected.
- At the end of January 2022, the Consumer Price Index (CPI) shows a decrease of 0.5% compared to the end of December 2021. The sector which affected the CPI the most was “Recreation and culture” (-4.7%), which led to an effect of -0.48 percentage points (ppts) on the  $\Delta$  CPI of January 2022 (-0.5%).
- Compared to January 2021 the CPI increased by 3.3%. The sector which affected the CPI the most was “Transport” (12.2%), which led to an effect of 1.49 ppts.
- The period average inflation for the period January 2021 - January 2022 is 1.2%, which is 3.0 ppts higher compared to the period average inflation for the period January 2020 - January 2021 (-1.8%).
- Utilities (Water and Electricity) did not register price changes in January 2022. The price of gasoline registered a decrease of 3.5% in January 2022 and had an effect of -0.17 ppts on the  $\Delta$  CPI of January 2022. The price of diesel registered a decrease of 3.6% in January 2022 and had an effect of -0.01 ppt on the  $\Delta$  CPI of January 2022.

This report is divided in 7 sections. An overview of the monthly percentage changes in the CPI and index per sector is presented in section 1. Section 2 provides the yearly percentage changes in the CPI and index per sector. The development of indices of main sectors and utilities is outlined in section 3. Section 4 presents the percentage change in the CPI of Aruba’s major trading partners and compares the CPI of Aruba and the USA. Section 5 presents an overview of the monthly and yearly percentage changes of the core inflation. Section 6 presents the price movements in food & catering services. The development of the subsistence level is presented in section 7 and is followed by the appendices.

## 1 Monthly change of the CPI

### 1.1 CPI and Inflation

The CPI of the total population of Aruba for the month of January 2022 is 100.07; a decrease of 0.5% compared to the CPI of December 2021 (100.60). An overview of the percentage change in the CPI ( $\Delta$  CPI) for different periods during 2021 and 2022 is shown in Table 1. The terms percentage change in the CPI and “inflation” (deflation) are considered similar and are used interchangeably. The inflation over the last 12 months (end of period inflation) is 3.3%, while the inflation over a period of 24 months (period average inflation) is 1.2%.

**Table 1: Overview of  $\Delta$  CPI**

Period		% Changes		Index	
		2022	2021	Current	Last

<sup>2</sup> Period average inflation

Figure 1 depicts the monthly  $\Delta$  CPI over a period of one year starting from January 2021, whereas the  $\Delta$  CPI for the month January for the years 2013 to 2022 is illustrated in Figure 2.

### 1.2 Changes in sector

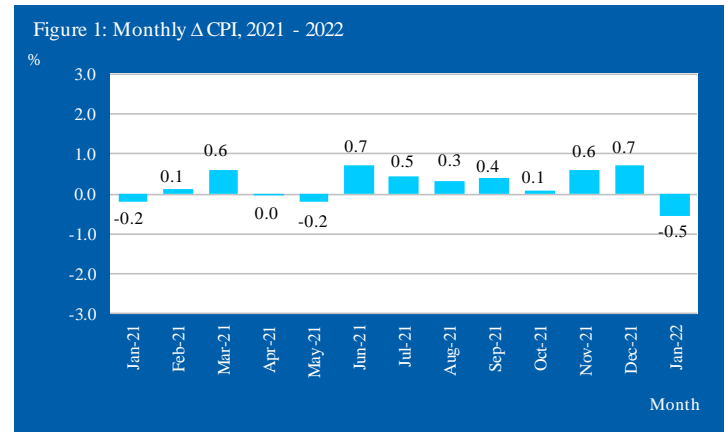

Figure 3 provides an overview of the percentage changes for the indices per sector for January 2022. The percentage change in index is further denoted as  $\Delta$  I. The largest  $\Delta$  I is observed for the “Household operation” sector with a decrease of 5.0%.

### 1.3 Changes in categories and subcategories

The largest positive and negative  $\Delta$  I is seen in the categories “Clothing” (6.2%) and “Audio-visual, photographic and information processing equipment” (-28.7%). In the “Food and non-alcoholic beverages” sector increases of 0.3% and 0.6% are observed for the categories “Food” and “Non-alcoholic beverages”, respectively. In the “Housing” sector the major  $\Delta$  I is observed for the category “Maintenance and repair of the dwelling” (3.2%). In the “Transport” sector the major  $\Delta$  I is observed for the category “Transport services” (-14.5%). In the “Recreation and culture” sector the major  $\Delta$  I is observed for the category “Audio-visual, photographic and information processing equipment” (-28.7%)<sup>1</sup>.

The categories which influenced the CPI calculation the most are “Holidays”, “Purchase of vehicles” and “Audio-visual, photographic and information processing equipment” which had an effect of respectively, -0.31, 0.22 and -0.21 ppts on the  $\Delta$  CPI.

Reference is made to tables 16 and 17 in Appendices 1 and 2. Table 16 provides an overview of the indices for the months January 2021, December 2021 and January 2022 together with corresponding weights per sector and the monthly, year-to-date (ytd), end of period and period average percentage changes for January 2022. In table 17 an overview of the effect on the monthly, year-to-date (ytd), end of period and period average CPI per sector and category for January 2022 is presented. The course of indices for 2010 – up to January 2022 is illustrated in Appendix 5.

<sup>1</sup> The focus is on the four major sectors which are: Housing, Transport, Food and non-alcoholic beverages and Recreation and culture. Together these sectors form 59% of the total weight of the basket of goods and services.

## 2 End of period change of the CPI

### 2.1 End of period change CPI for January 2022

The CPI increased from 96.89 in January 2021 to 100.07 in January 2022, an increase of 3.3%. This  $\Delta$  CPI is the second highest registered over a period of 6 years for the month January, and is 6.0 ppts higher than the  $\Delta$  CPI registered in 2021 (-2.7%) (see table 2).

Table 2: End of period  $\Delta$  CPI for February, 2017 - 2022

### 2.2 Changes in sector

An overview of the percentage change per sector over the period January 2021 - January 2022 is presented in table 3. The largest  $\Delta$  I is observed for the sector "Transport" with an increase of 12.2%. Furthermore, increases of 10.2%, 4.9% and 4.6% are observed for the "Clothing and footwear", "Food and non-alcoholic beverages" and "Education" sectors, respectively. A comparison of the  $\Delta$  I's for the years 2021 and 2022 is provided in figure 4.

## 3 Development of indices of main sectors and utilities

### 3.1 Indices main sectors

The four major sectors, “Housing”, “Transport”, “Food and non-alcoholic beverages” and “Recreation and culture”, constitute 58% of the total weight of the basket of goods and services, which are observed on a monthly basis. An overview of the course of indices for 2010 – up to January 2022 per sector and for the CPI is provided in figures 9-1 to 9-12 in Appendix 5.

Changes in the indices of the sectors “Housing” and “Transport” are mainly the result of changes in the international oil prices and prices of utilities during the respective months. The development of crude oil, fuel surcharge, electricity, water, gasoline and diesel prices is provided in table 5 and in the adjoining figures 6-1 and 6-2.

Table 5: Prices of utilities, gasoline and diesel, 2020 - 2021

### 3.2 Electricity

The price of electricity is determined in Aruban florins (Afl.) for an average usage by households. The average usage is 725.5 kWh per month. The electricity price for an average consumption of 725.5 kWh did not change in January 2022, it remained at Afl. 240.09. Figure 6-1 provides an overview of the course of changes in the electricity price for the period 2014 to 2022.

The total energy charge per kWh for a usage of electricity up to 500 kWh did not change in January 2022, it stayed at Afl. 31.09 cents per kWh. The total energy charge per kWh for a usage of electricity between 501 - 1000 kWh did not change in January 2022, it stayed at Afl. 31.99 cents per kWh.

### 3.3 Water

The price of water is determined in Afl. for an average usage (water consumption) by households. Figure 6-1 provides an overview of the course of changes in the water price for the period 2014 to 2022. The water price for an average usage by households did not change in January 2022, it remained at Afl. 137.05.

### 3.4 Gasoline and Diesel

The retail price of gasoline decreased by 3.5% from 239.0 cents per liter in December 2021 to 230.6 cents per liter in January 2022. In January 2022, the retail price of diesel registered a decrease of 3.6% from 202.3 cents per liter in December 2021 to 195.0 cents per liter in January 2022.

## 5 Core inflation

### 5.1 Core inflation

Core inflation is a measure of inflation which excludes certain items that face volatile price movements e.g. food products and energy. By calculating the core inflation these more volatile components are eliminated from the inflation. Core inflation indices serve to assess the mid- and long-term trend of the overall price level. For the purpose of adjusting monetary policy, many economists focus more intently on the core rate of inflation, as this allows for an in-depth assessment of inflationary processes ongoing in the economy.

### 5.2 Monthly change of the core inflation

In January 2022 the core inflation (measured over the period January 2021 - 2022) was 0.1%. In January 2022 the food index was 0.4%, while the energy index shows an increase of 7.5%.

## 6 Development of Food & catering services

### 6.1 Monthly change of Food & catering services for January 2022

The “Food & catering services” index showed an increase of 0.8% in January 2022, after an increase of 0.2% in December 2021. The index for “Food at home” showed an increase of 0.3% in January, as ten (10) of the eleven (11) “Food at home” indices increased in January 2022. The “Oils and fats” index registered the largest increase (1.8%) in January 2022. Furthermore, other significant increases were posted in the indices for “Fish and other seafood” (1.6%), “Sugar, jam, honey and other confectionery” (1.3%), “Meat” (1.0%), “Milk, cheese and eggs” (0.9%) and “Fruit” (0.7%). The “Vegetables” (-6.5%) index registered the only decrease in January 2022.

Table 11 provides an overview of the corresponding weights per food group together with the percentage changes and effect for January 2022.

## 7 Subsistence level

### 7.1 Subsistence level

The subsistence level is the minimum level of income which is perceived necessary to achieve an adequate standard of living in a given country. The subsistence level is usually determined by estimating the cost of all the essential resources that an average adult consumes in one month or year. This is commonly called a basic needs index, and varies according to the price of food, clothing, housing, transport and other items in the "basket". Equivalence scales are used to adjust for the assumed standard of living, of households of different sizes and composition. The scale assigns a weight of 1.0 for the first adult and 0.5 for each additional adult in the household (aged 15+) and a weight of 0.3 for each child (aged 0-14 years). The subsistence level is based on figures of the report "Bestaansminimum 2010" published by the CBS in December 2010 and is monthly updated for inflation using the monthly CPI. The reference unit used in this report is one of a household consisting of two adults and two children (aged 0-14 years).

### 7.2 Monthly change of the subsistence level for January 2022

Table 13 provides an overview of the subsistence level for a family of two adults and two children (aged 0-14 years) by sector registered over a period of 5 years for the month January. Over a period of one year the subsistence level increased by Afl. 182, from Afl. 4,739 in January 2021 to Afl. 4,921 in January 2022. The "Food and non-alcoholic beverages" sector shows the largest increase (Afl. 92), over this period.

## Glossary

### **The Consumer Price Index and Inflation**

The Consumer Price Index (CPI) measures changes in prices of consumer goods and services by households. Consumer price indices can be intended to measure either the rate of price inflation or deflation as perceived by households or changes in their cost of living. In case of inflation, the percentage change is positive and it indicates a decrease in the purchasing power of the consumers.

### **Monthly percentage change**

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of the previous month.

### **Year-to-date (ytd)**

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of December prior to the year under review.

### **End of period inflation (last 12 months)**

Percentage change in price indices of any aggregates of the CPI in relation to the respective price indices of the same month of the previous year.

### **Period average inflation (last 24 months)**

The period average inflation is calculated by comparing the annual average CPI of the concerning period with the annual average CPI of the concerning period of the previous year.

### **Effect**

Contribution of all percentage changes (of all respective aggregates) to the CPI.

### **Core inflation**

Core inflation is a measure of inflation that excludes certain items, which face volatile price movements. Core inflation eliminates the inflation of certain products that can have temporary price shocks because these shocks can diverge from the overall trend of inflation and give a false measure of inflation. The core rate of inflation is calculated by: total inflation excluding food and energy prices. In part, that is because the core is less volatile and reflects better the relationship of supply and demand in domestic product markets. The core usually is a better measure of the basic rate of inflation that will tend to emerge in the absence of supply shocks.

### **Food & catering services**

The “Food & catering services” index is composed of the indices for the “Food & Non-alcoholic beverages” sector (“Food at home”) and the “Catering services” (“Food away from home”) category.

### **Subsistence level**

The subsistence level is the minimum level of income, which is perceived necessary to achieve an adequate standard of living in a given country. The subsistence level is usually determined by estimating the cost of all the essential resources that an average adult consumes in one month or year. This is commonly called a basic needs index, and varies according to the price of food, clothing, housing, transport and other items in the “basket”. The subsistence level is monthly updated for inflation using the monthly CPI.
